

Bitupack

Ready-to-use cold mix asphalt
for temporary repairs to paved surfaces

WHAT IS BITUPACK?

Bitupack is a 5-7mm bituminous cold mix that is suitable for emergency and temporary repairs.

SUITABLE FOR:

BENEFITS OF BITUPACK

Convenient short-term solution

- Suitable for emergency and temporary repairs to asphalt and concrete pavements
- Surfaces can be used immediately

Easy to handle and apply

- Ready-to-use mixture
- No heating required
- Non-toxic formula

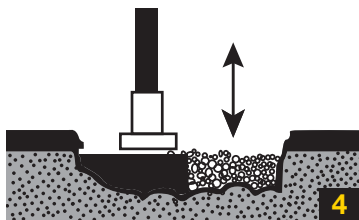

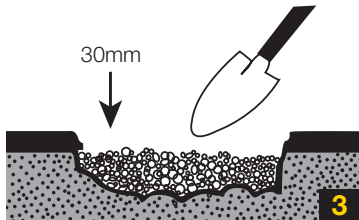

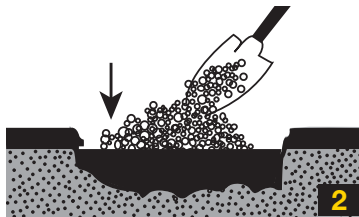

Contains recycled materials

- Minimum 20% recycled materials
- As a certified Product of Australia, Bitupack's ingredients come from Australia and all manufacturing occurs in Australia
- Manufactured and tested under stringent quality-controlled conditions

Contains
at least
20%
recycled
materials

Bitupack

INSTRUCTIONS FOR USE

1. Clear the hole of dirt and debris to create a firm base.
2. Coat exposed surfaces with bitumen emulsion to improve adhesion prior to filling with Bitupack. The product can be left in the sun for a few minutes to improve the ease of spreading.
3. Evenly spread in layers of not more than 30mm depth at a time and compact with a hand tamper, roller or plate compactor. A 30mm layer will compact to about 25mm.
4. If required, apply an extra layer of Bitupack and compact again. For deeper potholes and patches a long-term result can be achieved with Boral UltraPatch.
5. The surface can be used immediately. It is best to lightly dust the surface with sand if the repair is to be trafficked immediately by turning vehicles.

COVERAGE

The density of Bitupack is 2.4 tonnes per cubic metre. 60kg of Bitupack will cover one square metre at 25mm thick.

SAFETY PRECAUTIONS

Please read the installation guide and safety precautions on the package carefully before use.

- Place at ambient temperatures, no reheating is required.
- Ensure adequate ventilation is available. Gloves should be worn when handling Bitupack.
- A safety data sheet is available at www.boral.com.au/asphalt
