NOTE: Data is for Boral Limited and 100% owned and controlled subsidiaries, unless otherwise stated.

¹ Restated to reflect new reporting methodologies, enhanced data collection and review processes.

² Boral's waste recycled/re-used represents a range across Boral's products.

³ Comprises reserves which are licensed for extraction and economically recoverable, with geological certainty in the proven and probable category.

⁴ Typically, "years of reserves" are calculated based on current production rates; however, for the USA this number has been calculated based on longer-term average production rates, given the current significant downturn in demand.
