Environmental Monitoring Report

Noise Monitoring

Hall Quarry

August 2026

Date Published: 28th September 2026

This monitoring report is to satisfy the requirements of Section 66 (6) of the Protection of the Environment and Operations Act 1997, to make available, within 14 days of obtaining any monitoring data that relates to pollution under an Environment Protection Licence.

The monitoring of pollutants provided in this report is undertaken as per the requirements of Environment Protection Licence 4082 (EPL 4082 – Boral Hall Quarry)

This report provides environmental monitoring data for Hall Quarry for the period November 2017 to May 2025.

Hall Quarry Information	
Premise Details	Boral – Hall Quarry
Address	Kaveney's Rd, Murrumbateman NSW 2582
Licensee	Boral Resources (Country) Pty Ltd
EPL No	4082
EPL Location	https://apps.epa.nsw.gov.au/prpoeoapp/ViewPOEOLicence.aspx?DOCID=183732&SYSUID=1&LICID=4082
Date of dataset update	28/08/2026

Monitoring data in this report relates to the monitoring undertaken for the following environmental pollutants:

- Noise

Noise

Noise monitoring is conducted as per condition L2 of EPL 4082. Noise monitoring is conducted on an annual basis. The noise monitoring results are summarised below.

Qualifications related to Noise:

L2 Noise limits

L2.1 Noise generated by premises must not exceed the limits in the following table during the defined period, where LAeq means the equivalent continuous noise level – the level of noise equivalent to the energy-average of noise levels occurring over a measurement period.

Noise from the premises is to be measured at the Manager's Cottage, "Silverwattle", Kaveney's Road to determine compliance with this condition.

Noise Limit LAeq (15 minute)	Period
39 dB(A)	7am to 6pm Monday to Friday 7am to 1pm Saturday
37 dB(A)	6pm to 10pm Monday to Friday
36 dB(A)	All other times

L2.2 The noise limits identified in Condition L2.1 apply under meteorological conditions of: (a) Wind speed up to 3m/s at 10 metres above ground level; or (b) Temperature inversion conditions of up to 3 degrees C/100m and wind speed up to 2m/s at 10 metres above the ground

NOISE RESULTS

Next round of noise monitoring due April 2027.

April 2026 NOISE MONITORING ASSESSMENT

These results are presented as shown in the Noise Assessment report prepared by Muller Acoustic Consulting.

Muller Acoustic Consulting Pty Ltd (MAC) has completed a Noise Monitoring Assessment (NMA) on behalf of Boral Quarries Pty Limited for the Hall Quarry Operations, Jeir, NSW. The assessment was completed to quantify site noise emissions against relevant noise criteria pertaining to quarry operations and traffic noise.

Attended monitoring during Wednesday 15 April 2026 and Thursday 16 April 2026 identified that operational and road noise emissions generated by the quarry were audible on several occasions however, remained below relevant noise limits specified in the Environmental Protection Licence and Development Consent. These monitoring locations were dominated by extraneous sources such as traffic that predominately masked quarry operations.

Historical results

April 2025 NOISE MONITORING ASSESSMENT

These results are presented as shown in the Noise Assessment report prepared by Muller Acoustic Consulting.

Muller Acoustic Consulting Pty Ltd (MAC) has completed a Noise Monitoring Assessment (NMA) on behalf of Boral for their Hall Quarry, Jeir, NSW. The assessment was completed to quantify site noise emissions against relevant noise criteria pertaining to quarry operations and traffic noise.

Attended monitoring during Wednesday 27 April 2022 and Thursday 28 April 2022 identified that operational and road noise emissions generated by the quarry were audible during the morning shoulder and day periods at the Silverwattle (R2), however, remained below relevant noise limits.

Quarry noise remained inaudible at both Manager's Cottage (R1) and Barton Highway (R3) locations, and therefore satisfies specified noise limits in the Environmental Protection Licence and Development Consent. These monitoring locations were dominated by extraneous sources that predominately masked quarry operations.

APRIL 2021 NOISE MONITORING ASSESSMENT

The monitoring and assessment results are presented in individual tables for each monitoring location.

The results of the attended noise measurements at location R1 for the April 2021 survey period are summarised in **Table 4** with relevant EPL limits, the calculated quarry noise contribution and prevailing meteorology conditions at the time of each measurement.

Table 4 Operator-Attended Noise Survey Results – Manager's Cottage (R1)

Note: Meteorology data obtained from direct measurement by the operator.

APRIL 2020 NOISE MONITORING ASSESSMENT

The monitoring and assessment results are presented in individual tables for each monitoring location.

The results of the 15 minute attended noise measurements for Tuesday 21 April 2020 and Wednesday 22 April 2020 for R1 are summarised in Table 4.

Table 4 Operator-Attended Noise Survey Results – Manager's Cottage (R1)

Date	Time (hrs)	Primary Noise Descriptor (dBA re 20 µPa)			Meteorology	Description and SPL, dBA
		L _{Amax}	L _{Aeq}	L _{A90}		
22/04/2020	06:23				WS: <0.5m/s	Local Traffic 40-79
	(Morning Shoulder)	79	60	40	WD: W	Highway Traffic <35-40
					Rain: Nil	Birds 38-51
Quarry Site L _{Aeq} (15min) Contribution						<36
22/04/2020	08:17				WS: 1.0m/s	Local Traffic 40-76
	(Day)	76	60	40	WD: NW	Highway Traffic <32-40
					Rain: Nil	Birds 37-63
						Site Impacts 38-40
						Site Hum <32-34
Quarry Site L _{Aeq} (15min) Contribution						37
21/04/2020	19:57				WS: <0.1m/s	Local Traffic 30-77
	(Evening)	77	52	22	WD: W	Highway traffic 20-43
						Rain: Nil
Quarry Site L _{Aeq} (15min) Contribution						Site Not Operating

The results of the 15 minute attended noise measurements for Tuesday 21 April 2020 and Wednesday 22 April 2020 for R2 are summarised in Table 5.

Table 5 Operator-Attended Noise Survey Results – Silverwattle (R2)
