Presentation by Professor Patrick James

Professor Patrick James provided a presentation on the geomorphology landscape of the region, and a history of quarries around the world by location and geological time frames.

Updates by Boral

The following updates were provided by Boral in the attachment.

- Operational Update
- Environmental Works Update
- Planning and Approvals Update
- Community Engagement Update

Community Engagement

Open Day

DRAFT

Kate advised the committee that due to low numbers the open day had been deferred.

After some discussion it was recommended that the CCC could be involved in the open day preparation as well as marketing/advertising for the next open day. This was driven by the interest in making the event a success as was the previous one.

Providing the history of the site is also to be considered.

Kate will be back in SA to meet up with interested parties.

General Business

Dust Levels

The remaining time of the meeting centered around;

- the request for dust data beyond 24-hour averages
- the impact of pm2.5 and pm10 particles.

As an outcome to progress the discussion, Kevin Whelan (Boral) offered to meet privately with interested parties to discuss the matters further, and Razia Zariff (SA Health) offered to provide an SA Health Presentation on the topic.

A request for pm2.5 data was taken on notice.

Razia Zariff (SA Health) offered to provide an SA Health Presentation on the topic.

A further request asked for real-time air quality data over the last three months

Factors impacting dust levels include start-up of operations and the time of year.

Examples of Daily Activities

Examples of daily activities include;

- Transportation of materials across and out of the site
- Crushing
- Expected one blast per week and
- The movement of earthmoving machinery

There are 2-3 water trucks on site with a foam water mix to reduce dust.

TARP Presentation

A TARP presentation explaining process and meaning for the committee to be presented at the February meeting.

National Review of Quality Standards

The meeting was informed that there was a national review of standards to be undertaken and consultation would be sought from interested parties.

Consideration was sought to the possibility of:

- Measuring dust levels between operational and non-operational days and
- Working hours and non-working hours.

Dates for 2027

February 18th
May 20th
August 19th
November 18th

These dates were agreed by the meeting.

Next Meeting

February 18th 2027

Meeting Closed at 7:55pm
