

Carbon Price Announcement

Under the carbon pricing mechanism introduced by the Clean Energy legislation, from the 1st July 2012 a charge will be levied on emissions of carbon dioxide equivalent which will impact a broad range of Australian businesses including Boral.

While Boral continues to work on a range of carbon reducing projects to improve manufacturing and operational efficiency, it has become necessary to increase prices to enable Boral to recover the estimated costs associated with the impact of a carbon price on Boral's concrete and quarries businesses.

These costs will be itemised as a separate line on quotes and invoices to separate this cost from those of our normal business.

Region	Delivered Concrete M3	Ex-Bin Quarry Products
National	\$0.95 per m ³ + GST	\$0.12 per tonne + GST

This is a complicated piece of legislation and we have worked hard to provide you as much notice as possible of these increases to enable you to factor them into your future work.

We appreciate your ongoing business and look forward to your continued support.

Yours faithfully,
