## PART A

#### 2. PURPOSE

The purpose of the Dunmore Quarry Pollution Incident Response Plan is to:

- Provide direction to the staff at Dunmore Quarry in responding to pollution incidents at the Dunmore operations including the Dunmore Concrete Batching Plant (DCBP);
- Ensure timely communication about a pollution incident is provided to staff at the premises,
  the Environment Protection Authority (EPA), other relevant authorities specified in the
  Protection of the Environment Legislation Amendment Act (POELA Act) (including
  Shellharbour City Council, NSW Ministry of Health, Safework NSW, and Fire and Rescue
  NSW) and persons outside the operations who may be affected by the impacts of a pollution
  incident that is not trivial;
- Minimise and control the risk of a pollution incident at Dunmore Quarry by identifying key risks and planned actions to minimise and manage those risks;
- Detail the training requirements for this plan, identifying persons responsible for implementing it, and ensuring that the plan is regularly tested for accuracy, currency and suitability.

### 3. LEGISLATIVE REQUIREMENTS

The specific requirements for a Pollution Incident Response Management Plan (PIRMP) are set out in Part 5.7A of the POEO Act and the Protection of the Environment Operations (General) Regulation 2009 (POEO(G) Regulation). Part 3A of the POEO Act and the Protection of the Environment Operations (General) Regulation 2009 (POEO(G) Regulation) describes specific components and requirements of a PIRMP. Table 1 summarises the location of these requirements in the document.

Table 1: Summary of Legilsative Requirements of a PIRMP

Section/Clause	Requirement	Location in PIRMP					
	Part 5.7A POEO Act 1997						
147	(1) For the purposes of this Part—	Section 4					
	(a) harm to the environment is material if—						
	(i) it involves actual or potential harm to						
	the health or safety of human beings or to						
	ecosystems that is not trivial, or						
	(ii) it results in actual or potential loss or						
	property damage of an amount, or						
	amounts in aggregate, exceeding \$10,000						
	(or such other amount as is prescribed by						
	the regulations), and						

	(b) loss includes the reasonable costs and expenses	
	that would be incurred in taking all reasonable and	
	practicable measures to prevent, mitigate or make	
	good harm to the environment.	
	(2) For the purposes of this Part, it does not matter that	
	harm to the environment is caused only in the premises	
	where the pollution incident occurs.	
	<u>'</u>	
153A	The holder of an environment protection license must	EPL 77 and this
	prepare a pollution incident response management plan that	document
	complies with this Part in relation to the activity to which the	
	license relates.	
153C	A pollution incident response management plan must be in	
	the form required by the regulations and must include the	
	following—	
	(a) the procedures to be followed by the holder of the	Section 9 and 10
	relevant environment protection licence, or the occupier of	
	the relevant premises, in notifying a pollution incident to—	
	(i) the owners or occupiers of premises in the vicinity of the	Section 5
	premises to which the environment protection licence or the	
	direction under section 153B relates, and	
	(ii) the local authority for the area in which the premises to	Section 8, 9, 10, 11 and
	which the environment protection licence or the direction	18, Figures 4-8.
	under section 153B relates are located and any area	
	affected, or potentially affected, by the pollution, and	
	(iii) any persons or authorities required to be notified by Part	Table 9-11, Section 8,
	5.7,	9, 10,11 and 18
	(b) a detailed description of the action to be taken,	Table 9-11
	immediately after a pollution incident, by the holder of the	
	relevant environment protection licence, or the occupier of	
	the relevant premises, to reduce or control any pollution,	
	(c) the procedures to be followed for co-ordinating, with the	Section 8, 9, 10 ,11 and
	authorities or persons that have been notified, any action	18
	taken in combating the pollution caused by the incident and,	
	in particular, the persons through whom all communications	
	are to be made,	
	(d) any other matter required by the regulations.	Section 10, 17
1530	A parson who is required to propers a pollution incident	Coation 2
153D	A person who is required to prepare a pollution incident response management plan under this Part must ensure that	Section 2
	1	
	it is kept at the premises to which the relevant environment	
	protection license relates, or where the relevant activity takes place, and is made available in accordance with the	
152F	regulations.	Section 12,13
153E	A person who is required to prepare a pollution incident response management plan under this Part must ensure that	JECCION 12,13
	it is tested in accordance with the regulations	
153F	If a pollution incident occurs in the course of an activity so	Section 4, Table 9-11
1335	that material harm to the environment (within the meaning	3500001 4, Table 9-11
	of section 147) is caused or threatened, the person carrying	
	1	
	on the activity must immediately implement any pollution incident response management plan in relation to the	
Do et	activity required by this Part  3A POEO(G) Regulation 2009 Pollution Incident Response Manage	ament Plans
rait	note: See also 153C (a)-(c) of the POEO Act 1997	EIIICIIL FIAIIS
	note. See also 1330 (a)-(c) of the POEO ACC 1397	

98C(1) (a)	A description of the hazards to human health or the	Table 2, Table 8
	environment associated with the activity to which the license	
	relates,	
98C(1) (b)	The likelihood of any such hazards occurring, including	Table 8
	details of any conditions or events that could, or would,	
	increase that likelihood,	
98C(1) (c)	Details of the pre-emptive action to be taken to minimise or	Section 11, Table 2, 8,
	prevent any risk of harm to human health or the	9 -11
	environment arising out of the relevant activity	
98C(1) (d)	An inventory of potential pollutants on the premises or used	Table 2
	in carrying out the relevant activity	
98C(1) (f)	A description of the safety equipment or other devices that	Table 2, Figure 4-8
	are used to minimise the risks to human health or the	, 5
	environment and to contain or control a pollution incident,	
98C(1) (g)	the names, positions and 24-hour contact details of those	Section 9, 18
( ) (0)	key individuals who:	,
	No, managas mos	
	<ol> <li>are responsible for activating the plan, and</li> </ol>	
	II. are authorised to notify relevant authorities under	
	section 148 of the Act, and	
	III. are responsible for managing the response to a	
	pollution incident,	
	permanent	
98C(1) (h)	the contact details of each relevant authority referred to in	Section 11, 18
	section 148 of the Act,	
98C(1) (i)	Details of the mechanisms for providing early warnings and	Section 11, Table 9-11
	regular updates to the owners and occupiers of premises in	
	the vicinity of the premises to which the license relates or	
	where the scheduled activity is carried on	
98C(1) (j)	The arrangements for minimising the risk of harm to any	Section 11, Table 2, 8,
	persons who are on the premises or who are present where	9-11
	the scheduled activity is being carried on	
98C(1) (k)	A detailed map (or set of maps) showing the location of the	Figure 1, Figure 4-8
	premises to which the license relates, the surrounding area	
	that is likely to be affected by a pollution incident, the	
	location of potential pollutants on the premises and the	
	location of any storm water drains on the premises	
98C(1) (I)	A detailed description of how any identified risk of harm to	Section 11, Table 8, 9-
	human health will be reduced, including (as a minimum) by	11
	means of early warnings, updates and the action to be taken	
	during or immediately after a pollution incident to reduce	
	that risk,	
98C(1) (m)	The nature and objectives of any staff training program in	Section 12
	relation to the plan	
98C(1) (n)	The dates on which the plan has been tested and the name	Table 7
	of the person who carried out the test,	
98C(1) (o)	The dates on which the plan is updated,	Section 1
98C(1) (p)	The manner in which the plan is to be tested and maintained.	Section 12, 13, 14

## 4. DEFINITION OF A 'POLLUTION INCIDENT'

The definition of a pollution incident is:

"pollution incident means an incident or set of circumstances during or as a consequence of which there is or is likely to be a leak, spill or other escape or deposit of a substance, as a result of which pollution has occurred, is occurring or is likely to occur. It includes an incident or set of circumstances in which a substance has been placed or disposed of on premises, but it does not include an incident or set of circumstances involving only the emission of any noise."

A pollution incident is required to be notified if there is a risk of 'material harm to the environment', which is defined in section 147 of the POEO Act as:

- a) harm to the environment is material if:
  - i) it involves actual or potential harm to the health or safety of human beings or to ecosystems that is not trivial; or
  - ii) it results in actual or potential loss or property damage of an amount, or amounts in aggregate, exceeding \$10,000 (or such other amount as is prescribed by the regulations); and
- b) loss includes the reasonable costs and expenses that would be incurred in taking all reasonable and practicable measures to prevent, mitigate or make good harm to the environment.

Dunmore Quarry is now required to report non-trivial pollution incidents immediately to the EPA, NSW Health, Fire and Rescue NSW, Safework NSW and the local council.

#### 5. SCOPE

This PIRMP must be followed by employees, contractors and visitors of Dunmore Quarry, to assist in the early response to, and reporting of, a pollution incident.

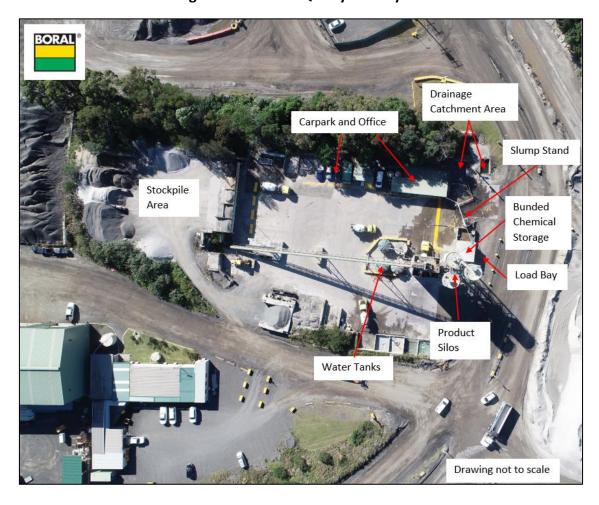

#### 6. SITE LAYOUT

The overall site layout of Dunmore Quarry and DCBP is shown in Figure 1 and 2 below. Please note that Part B of this PIRMP contains detailed maps which describe the important details for each pollution incident scenario.

Figure 1 Dunmore Quarry Site Layout

#### Figure 2 Dunmore Concrete Batching Plant Site Layout

#### 7. POTENTIAL POLLUTING SUBSTANCES

Table 1 below is an inventory of potential pollutants kept on the premises. This inventory provides a description of the main hazards to human health or the environment, an assessment of the likelihood of the hazards occurring and also includes the current controls and safety equipment and/ or pre-emptive actions in place to minimise or prevent risk of harm to human health or the environment.

Table 2: Inventory of Potential Polluting Substances Initial Assessment (clause 98C (1) (d) & (e)

## 8. ROLES AND RESPONSIBILITIES

**Table 3: Site Personnel Roles and Responsibilities** 

Position	Responsibility
Employees and Contractors	Following the procedures outlined in the PIRMP and related documents
	Immediately alerting Supervisor or Team
	Leader of any environmental incidents or near-
	misses.
Team Leaders / Front Line Supervisors	Following the procedures outlined in the PIRMP
	and related documents (HSEQ MS 3-02)
	Immediately alerting Site/Quarry Manager or, in
	case of their unavailability, Environment and
	Stakeholder Advisor of any potential environmental
	incidents or near-misses.
	Assist in conducting incident investigations
Site / Operations Manager and/or	Authorisation of the PIRMP
Site Environment and Stakeholder Advisor	Administration, maintenance and implementation
	of the PIRMP
	Assessing whether the incident is non-trivial and
	has caused or threatens "material environmental harm" and communicate details to management
	name and communicate details to management
	Providing direction and advice on incident response
	Coordinating communication to neighbours
	through Stakeholder Relations Manager
	Ensuring that investigations are undertaken to a
	level corresponding to the level of risk and impact.
Senior Health and Safety Business Partner	Make a determination as to whether the incident
and/or NSW Senior Environment Business Partner	(as defined in section 147 of the POEO Act) is non-
	trivial and therefore reportable to external agencies
	Inform Executive General Manager and Group
	Management of notification to External Agencies
	Undertake notifications as defined in PIRMP
	Authorise notifications to public and/or media following GRP-HSEQ-2-02

#### 9. INTERNAL POLLUTION INCIDENT REPORTING

Any pollution incident satisfying the *material harm* threshold must be immediately reported to relevant statutory authorities by either the Senior Health and Safety Business Partner, or NSW Senior Environment Business Partner.

In cases where "material harm" level cannot be immediately assessed or insufficient information comes to hand on the severity of the incident, the general advice is to err on the side of caution and notify the Relevant Authorities with a qualification that the situation could not yet be fully assessed.

Until further notice the following procedure needs to be followed:

- 1. When a pollution incident occurs, a person who has become aware of it must immediately bring it to the attention of his/her immediate Supervisor or Manager
- 2. If necessary, first ring "000" for Emergency Services
- 3 At least one of the following BCM personnel must be contacted **immediately**:

Name Function Mobile number

**Table 4 Key Personnel Contact Information** 

Whilst personal contact details for the following are available in the Controlled on site Pollution Incident Response Management Plan they do not appear in this public document

4. Quarry Manager or in case of his unavailability one of the Senior Management personnel listed above, is to **immediately** notify the NSW Senior Health and Safety Business Partner or NSW Senior Environment Business Partner

- 5. NSW Senior Health and Safety Business Partner to **immediately** notify all Appropriate Regulatory Authorities specified in Section 9.
- 6. In borderline situations, where the exceedance of the trigger level of "material harm" of a pollution incident may not be clear, a quick assessment including consultation with Boral environmental personnel should be undertaken to help the decision whether to notify or not.
- 7. Boral's Senior Management must be informed promptly of the fact of immediate notification to the Authorities. This includes environmental personnel listed above, as well as, James Collings, Angus Shedden and Greg Johnson for Quarries and/or Craig Isedale for Concrete.

#### 10. EXTERNAL POLLUTION REPORTING

As the legislation requires that notification must be done immediately upon becoming aware of the pollution incident, it is unlikely that a detailed picture will be available for reporting. Notwithstanding, is seems that some of the Government Authorities prepared a detailed questionnaire which is being filled at the time of this initial notification. Under the stress of incident handling it could be easy to provide a hasty, inaccurate estimate of the situation when answering these questions.

Therefore, the notification should be restricted to the facts known and nothing should be assumed or guessed. The details will be provided to the asking Authority later when more information comes to hand.

The initial notification should include as much of the following information (if known) as possible:

- location and time of the pollution incident;
- type of the incident (spill, fire, unlicensed harmful discharge, etc.);
- assessed level of incident gravity: "it seems to be..." (e.g. "a relatively minor spill", "major fire", "explosion limited to one building", etc.);
- whether the Emergency Services have been required to attend.

Unless known for a fact, the answers to other questions should be politely deferred until a better assessment of the situation can be made.

The Boral person who is responsible for notifying the Authorities (NSW Senior Health and Safety Business Partner or NSW Senior Environment Business Partner) about the incident must prepare a Notification Log (a suitable form is attached in Appendix C) with the details of time of notifications and the persons who took to the call. The Authorities will generally provide an Incident Notification Number.

Notification of all Appropriate Government Authorities (at least 5 entities) may take considerable time. Delays may be experienced connecting to the right person or no contact may be possible after hours. All such instances should be recorded in the Notification Log.

#### 11. POLLUTION INCIDENT AUTHORITY CONTACT LIST

**Table 5 Pollution Incident Authority Contact List** 

Government Authority - compulsory notifications	Emergency notification phone number
EPA – Environment Line	131 555
Fire and Rescue NSW (FRNSW)	1300 729 579
Shellharbour City Council	4221 6111
Public Health Unit (South East Sydney / Illawarra AHS)- Wollongong SESI PHU	HealthLink (24 hr.)- 0- 1800 063 635 Head Office- Wollongong- 0- 4221 6700
Safework NSW	131050 Company ABN asked: 51 000 756 507
Government Authority - ring if relevant	Emergency notification phone number
Government Authority - ring if relevant  Roads and Maritime Services (road spills)	
	number
Roads and Maritime Services (road spills)	number 132 701
Roads and Maritime Services (road spills)  Police & Ambulance	132 701 000
Roads and Maritime Services (road spills)  Police & Ambulance  NSW Office of Water	number  132 701  000  8838 7885

Communication with the local community may also be undertaken depending on the circumstances of the pollution incident. Appendix B describes in the response action tables the criteria whether an incident may require community notification. If deemed necessary, Dunmore Quarry would consider the following options for providing early warning and ongoing information to the community on pollution incidents:

- Direct phone contact with any local residents directly impacted by the pollution incident using the details in Table 5 below.
- Letter Box drops of incident information and site contacts to local residents impacted by the pollution incident.

• The inclusion of incident details through the routine Community Consultative Committee meetings.

The Stakeholder Relations Manager can assist in the process of communicating with the community, as per the Stakeholder Engagement Plan for the site.

**Table 6: Neighbour Notification List** 

Reference	Contact Name	Address	Contact Details

Whilst personal contact details for the following are available in the Controlled on site Pollution Incident Response Management Plan they do not appear in this public document

#### 12. INCIDENT REPONSE TRAINING

Dunmore Quarry will implement the Pollution Incident Response Management Plan by training or providing information to relevant employees and contractors in relevant areas of the Plan. The nature and objectives of staff training is to relate to site personnel the

importance of early notification of any incidents and spills to site supervisors and key personnel.

Training or information will be provided on the following:

- The contents and intent of this PIRMP;
- The roles and responsibilities of site staff in relation to this PIRMP;
- Spill response procedures;
- General environmental awareness; and / or
- Hazardous materials awareness.

Site inductions for visitors and sub-contractors also advise individuals to report any environmental incidents or spills to site supervisors and key personnel immediately. Key site personnel and supervisors participate in PIRMP Tests which are used as practical training and can also be used to identify any potential gaps or areas for improvement for the PIRMP. A summary of the PIRMP Drills undertaken at Dunmore Quarry is shown below in Table 6.

**Table 7: PIRMP Drills Undertaken at Dunmore Quarry** 

Test Date	Version of PIRMP tested	Incident Drilled
24/04/24	V18	Incident #10 Car park/fuel tank failure
10/03/23	V17	Incident #1 Loss of fuel from mobile plant with
		new supervisor
25/05/21	V15	Incident #1 Loss of fuel from mobile plant with
		new supervisor
06/03/20	V14	Incident #1 Loss of fuel from mobile plant
26/06/19	V12	Incident #10 Car park/fuel tank failure
19/10/17	V10	Incident #3: Failure of drain valve on bund
04/10/16	V6	Incident #5: Excessive airborne dust off stockpile
01/09/15	V5	Incident #5: Airborne dust during operations in
		the afternoon
29/08/14	V4	Incident #7: Loss of hydraulic oil from water cart
		being serviced
30/08/13	V3	Incident #2: Loss of fuel while re-fueling

Please note that V13 of the PIRMP consolidated the incident list. Incident numbers may be reflective of old versions of the PIRMP.

A sign-off sheet is kept of the personnel present for the undertaking of a PIRMP Drill and a record is kept on when and how the PIRMP is communicated to employees. This information forms a section of the PIRMP Drill document.

#### 13. PIRMP TESTING

Plans must be tested routinely at least once every 12 months. The testing is to be carried out in such a manner as to ensure that the information included in the plan is accurate and up to date, and that each plan is capable of being implemented in a workable and effective manner.

Routine testing of the PIRMP will be conducted annually, and can be completed through the following methods:

- Simulated environmental emergency drills/exercises; or
- Desktop simulations.

#### 14. PIRMP REVIEW

Revisions are to be coordinated by the Site Manager and Environment and Stakeholder Advisor. The objectives of a review are:

- To maintain compliance with the statutory requirements; and
- To identify opportunities for improvement in the plan, and reduce the risk to human health and the environment.

#### 14.1. EVENT BASED

Events which may trigger a review of this Plan or its associated documents include:

- Within 1 month of reporting to the nominated parties in accordance with the plan, after a
  pollution incident; or
- Modification/improvement to the system.

#### 14.2. TIME BASED

Dunmore Quarry will review this management plan routinely every 12 months. The Plan review will include:

- This Document; and
- Legislation, Approval and Licence changes.

## 15. APPENDIX A: RISK ASSESSMENT ON POTENTIAL IMPACTS

## **Table 8 Risk Assessment on Potential Impacts**

	Hazard and Likelihood Risk Assessment and Corrective Control Measures								
Site:	Responsible Person: Review Date:								
Dunmore Qu	unmore Quarry Glenn Lowerson 24 April 2024								
Name / ref of pollutant/ chemicals	Description of Hazard / Incident leading to hazard	Consequence	Likelihood	Risk	Factors which could increase risk	1 · · · · · · · · · · · · · · · · · · ·	tion of controls. (See Table 1 for list of ent controls).	Responsibl e person	Action date
Diesel/Hydrocarbo ns	Incident #1 Uncontrolled loss of diesel or other hydrocarbon products that could result in material harm to the environment or human health	1	1	L1	Dry, windy conditions (increase fire danger) or heavy rain/flood conditions (will increase potential for spill to spread to catchment drainage areas)	no release to soil or water.  Likelihood: (Unlikely): Diesel tank tanks. Due to location of tank, da external equipment. In addition tintegrity with low risk of failure the	ed entirely by existing primary bund with s are self bunded double walled fuel mage to tanks is unlikely to occur from anks are maintained in good structural prough corrosion. Drain valve, hoses and ned in good structural integrity with low	As per PIRMP action plan	When required
Airborne dust	Incident *2 Excessive airborne dust from stockpiled material, mobile plant or traffic areas causing material harm to the environment or significant impact to community	1	1	L1	Dry, windy conditions (increase wind erosion and dust transport). Summer months with long periods of extended dry conditions.	causing nuisance to surrounding Likelihood: (Unlikely): Stockpiles	are maintained to a manageable level on inklers and water cart onsite during erves act as buffer land from	As per PIRMP action plan	When required
Sediment laden stormwater	Incident #3 Uncontrolled release of sediment laden water from storage dams causing material harm to the environment	1	2	L2	Extended periods of rain increase the risk. Late Summer/early Autumn is typically the wettest part of the year on site.	Consequence: (moderate): Failure of one or more sediment dams are likely to result in off-site impacts to water courses which would predominantly reduce water quality over a short period of time. As such,		As per PIRMP action plan	When required
Blast fume	Incident #4 Excessive blast fume from blasts causing significant and unexpected impact to the community	1	1	L1	Windy conditions will increase potential for blast fume to leave site. Excessive periods of sleeping shots (>7 days) loading into wet holes	Consequence: (minor): Blast fumingh winds, of short duration and Likelihood: (unlikely):Blast Manag	e would be localised and dispersed with not cause long term impacts.  gement Plan in place to reduce the extended periods of time and not	As per PIRMP action plan	When required

## PART B

### 16. PART B: PIRMP RESPONSE ACTIONS AND MAPS

## Table 9: Incident #1 Diesel/hydrocarbon Spill Response Actions

Incident #1	Uncontrolled loss of discolor other hydrocarbon products that could result in material
incident "1	Uncontrolled loss of diesel or other hydrocarbon products that could result in material
	harm to the environment or human health. See Figure 3 and 4 and 5
	Actions Required:
	Contact all relevant people/department (refer to Immediate Reporting Contact Sheet)
	Ensure bund/liner are capturing full volume of diesel
	<ul> <li>Ensure bund integrity is sound throughout the entire period of incident (i.e. periodic inspections)</li> </ul>
	Contact service provider (Caltex No. 1800033111 or Transpacific 02 96007185) to pump- out bund contents
	Area to be restricted to Incident Response Personnel
	Ensure spill kit available for any release from bund/liner
	If any release from bund/liner onto unsealed soil/surface water - Environmental
	Consultants to be engaged to investigate and remediate contamination.
	Repair/replace tanks
	Inspect bund for ongoing serviceability
Alarm raising	Any personnel involved or witnessing incident to report to immediate supervisor and PIRMP
Alailii laisilig	actions to be implemented.
Emergency	Emergency Controller: Quarry Manager or delegate
• •	Call service provider: Quarry Manager or delegate
Controller	, , , , , , , , , , , , , , , , , , , ,
	Spill Kit manager: Onsite supervisor or delegate  Desired in inspections and on the supervisor of site and bands Onsite supervisor and allocate
	Periodic inspections and update reporting of site and bund: Onsite supervisor or delegate
Scale of incident	Incident would be restricted to diesel storage area with minimal external impact, however,
	potential for bund/liner overflow or failure may result in soil and surface water
	contamination that will require specialist investigation/remediation.
Evacuate	Only if fire or explosion potential exists. Quarry Manager and any advice provided by Fire
	Department as part of attendance after immediate notification.
Communications	Internal:
	Quarry Manager or delegate to use contact sheet for all internal (Boral) contacts
	External mandatory:
	Immediate Reporting Contact Sheet to be used
	External non-mandatory:
	Contact neighbours 5, 6, 7 and 8 only if diesel has escaped into storm-water drainage
	lines and will enter Rocklow Creek. See Table 5 Section 11 for the Neighbor Notification
	List.
Rescuer /	As per Site Emergency Plan or Fire Department as part of Immediate Reporting

Figure 3: Go-line Above Ground Diesel Storage Area

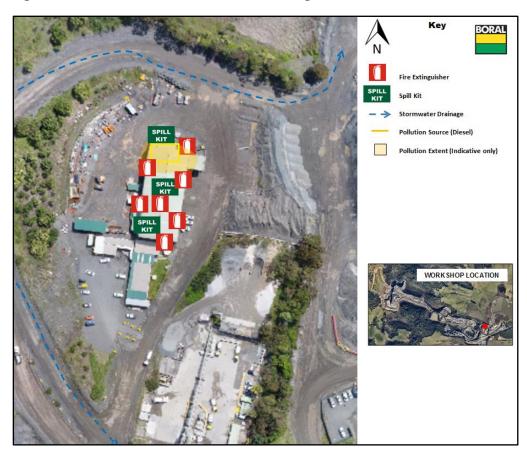

Figure 4: Workshop Diesel/hydrocarbon Storage Area

Please note that hydrocarbon loss from a mobile location could occur at a variable location on the site.

Figure 5 DCBP Hydrocarbon Pollution Sources Fires Extinguisher and Spill Kit locations

Note that no diesel fuelling facilities are located at DCBP and diesel storage would be primarily in the tanks of vehicles on site. As such the diesel sources are not shown in Figure 5.

Table 9: Incident #2: Excessive Airborne Dust Response Actions

Incident #2	Excessive airborne dust from stockpiled material, mobile plant or traffic areas causing material harm to the environment or significant impact to community. See Fig 4 & 5.				
	<ul> <li>Actions Required:</li> <li>Employees, Contractor/Visitor to notify site representative of issue immediately.</li> <li>Dust suppression activity to commence immediately on stockpiles via water cart or other means. Any operations associated with disturbing the stockpiles, such as driving and dumping, to be minimised or ceased.</li> <li>Daily monitoring to be undertaken to assess weather and site conditions</li> <li>Contact all relevant people/department (refer to Immediate Reporting Contact Sheet)</li> </ul>				
Alarm raising	Any personnel involved or witnessing incident to report to immediate supervisor and PIRMP actions to be implemented.				
Emergency	Emergency Controller: Quarry Manager or delegate				
Controller	Call service provider: Quarry Manager or delegate				
	Periodic inspections and update reporting of site and stockpiles: Onsite supervisor or delegate				
Scale of incident	Incident would be localised to the area surrounding stockpile area, with minimal external offsite impact.				
Evacuate	Only if fire or explosion potential exists. Quarry Manager and any advice provided by Fire Department as part of attendance after immediate notification.				
Communications	<ul> <li>Internal:         <ul> <li>Glenn Lowerson - Quarry Manager</li> </ul> </li> <li>Greg Johnson &amp;/or Matt Bray – Senior Environment Business Partner / Environmental and Stakeholder Advisor</li> <li>External mandatory:         <ul> <li>Immediate Reporting Contact Sheet to be used</li> </ul> </li> <li>External non-mandatory:         <ul> <li>Contact neighbors affected (will be dependent on wind direction). The environmental representative is to be consulted as to which neighbours will be affected by a particular wind direction. See Table 5 Section 11 for the Neighbor Notification List.</li> </ul> </li> </ul>				
Rescuer / respondent + safety checks	As per Site Emergency Plan or Fire Department as part of Immediate Reporting				
Rescue + First	As per Site Emergency Plan or Fire Department as part of Immediate Reporting				
Clean up and	All water carts to be placed on areas producing airborne dust. If necessary work must be				
Waste disposal	ceased to control airborne dust. No disposal of waste required.				
Reporting and	See HSEQ MS:				
re-preparedness	Incident Reporting, Investigation and Action Management Standard (GRP-HSEQ 3-02)				

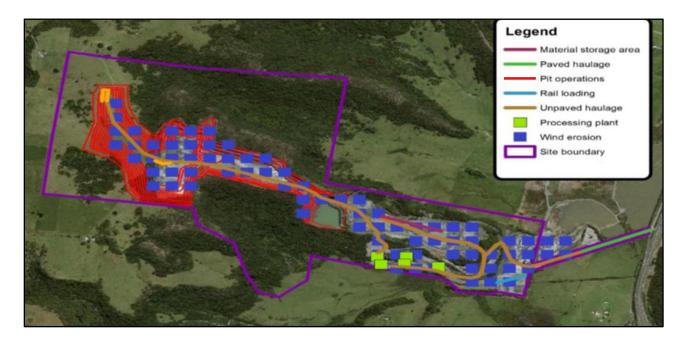

Figure 4: Sources of Dust Pollution at Dunmore Quarry

Please note that pollution controls include operational response which is not included on these maps. See Table 1 in Section 7 for more detail on pollution controls for Incident #2.

Figure 5: Potential Suburbs Affected by Dust Emissions under Adverse Conditions

Table 10: Incident #3: Uncontrolled Release of Stormwater Response Actions

Incident #3	Uncontrolled release of sediment laden water from storage dams causing material harm to
	the environment. See Fig #6
	Actions Populised
	Actions Required:  Contact all relevant people/department (refer to Immediate Reporting Contact Sheet)
	<ul> <li>Ensure bund integrity is sound throughout the entire period of incident (i.e. periodic inspections)</li> </ul>
	Contact local neighbours if going to be in inundated by rise of water
	Area to be restricted to Incident Response Personnel
	If any release from site onto unsealed soil/surface water - Environmental Consultants to
	be engaged to investigate and remediate contamination, if any
	Contact local contractor to rebuild dams immediately
Alarm raising	Any personnel involved or witnessing incident to report to immediate supervisor and PIRMP
7	actions to be implemented.
Emergency	Emergency Controller: Quarry Manager or delegate
Controller	Call service provider: Quarry Manager or delegate
	Spill Kit manager: Onsite supervisor or delegate
	<ul> <li>Periodic inspections and update reporting of site and bund: Onsite supervisor or delegate</li> </ul>
Scale of incident	Catastrophic failure of one or more sediment dams are likely to result in off-site impacts to
Scare of including	water courses which would predominantly reduce water quality over a short period of time.
	As such, impact to the environment/human health is not considered to be significant.
Evacuate	Only if flood potential exists. Quarry Manager and any advice provided by Fire Department as
	part of attendance after immediate notification.
Communications	Internal:
	Quarry Manager or delegate to use contact sheet for all internal (Boral) contacts
	External mandatory:
	Immediate Reporting Contact Sheet to be used
	External non-mandatory:
	• Contact neighbours 5, 6, 7 and 8 in the case of a sediment dam failure affecting water
	quality downstream over an extended period of time. See Table 5 Section 11 for the
	Neighbor Notification List.
Rescuer /	As per Site Emergency Plan or Fire Department as part of Immediate Reporting
