PART A: COMPLIANCE REQUIREMENTS, POLLUTION INVENTORIES AND RISK ASSESSMENTS

1. PURPOSE

The purpose of the Emu Plains Recycling Pollution Incident Response Plan is to:

- Provide direction to the staff at Emu Plains Recycling in responding to pollution incidents at the Emu Plains operations;
- Ensure timely communication about a pollution incident is provided to staff at the premises, the Environment Protection Authority (EPA), other relevant authorities specified in the Protection of the Environment Legislation Amendment Act (POELA Act) (including Penrith City Council, NSW Ministry of Health, Work Cover NSW, and Fire and Rescue NSW) and persons outside the operations who may be affected by the impacts of a pollution incident;
- Minimise and control the risk of a pollution incident at Emu Plains Recycling by identifying key risks and planned actions to minimise and manage those risks;
- Detail the training requirements for this plan, identifying persons responsible for implementing it, and ensuring that the plan is regularly tested for accuracy, currency and suitability.
- A hard copy of the PIRMP is to be kept on the site environmental board in the Emu Plains Recycling Main Office. A soft copy of the PIRMP and EPL 2062 is made available online https://www.boral.com.au/our-commitment/environmental-reporting.

2. LEGISLATIVE REQUIREMENTS

The specific requirements for a Pollution Incident Response Management Plan (PIRMP) are set out in Part 5.7A of the POEO Act and the Protection of the Environment Operations (General) Regulation 2009 (POEO (G) Regulation). Part 3A of the POEO Act and the Protection of the Environment Operations (General) Regulation 2009 (POEO (G) Regulation) describes specific components and requirements of a PIRMP.

Table 2 summarises the location of these requirements within the document.

Table 2: Summary of Legislative Requirements of a PIRMP

| Section/Clause | Requirement | Location in PIRMP |
|----------------|---|---|
| | Part 5.7A POEO Act 1997 | |
| 147 | (a) harm to the environment is material if— (i) it involves actual or potential harm to the health or safety of human beings or to ecosystems that is not trivial, or (ii) it results in actual or potential loss or property damage of an amount, or amounts in aggregate, exceeding \$10,000 (or such other amount as is prescribed by the regulations), and (b) loss includes the reasonable costs and expenses that would be incurred in taking all reasonable and practicable measures to prevent, mitigate or make good harm to the environment. (2) For the purposes of this Part, it does not matter that harm to the environment is caused only in the premises where the pollution incident occurs. | Section 3 |
| 153A | The holder of an environment protection licence must prepare a pollution incident response management plan that complies with this Part in relation to the activity to which the licence relates. | EPL 2062 and this document |
| 153C | A pollution incident response management plan must be in the form required by the regulations and must include the following— (a) the procedures to be followed by the holder of the relevant environment protection licence, or the occupier of the relevant premises, in notifying a pollution incident to— (i) the owners or occupiers of premises in the vicinity of the premises to which the environment protection licence or the direction under section 153B relates, and (ii) the local authority for the area in which the premises to which the environment protection licence or the direction under section 153B relates are located and any area affected, or potentially affected, by the pollution, and (iii) any persons or authorities required to be notified by Part 5.7, (b) a detailed description of the action to be taken, immediately after a pollution incident, by the holder of the relevant environment protection licence, or the occupier of the relevant premises, to reduce or control any pollution, (c) the procedures to be followed for coordinating, with the authorities or persons that have been notified, any action taken in combating the pollution caused by the incident and, in particular, the persons through whom all communications are to be made, (d) any other matter required by the regulations. | Section 8 and 9 Section 6 Section 7, 8, 9, 10 and 14 Section 7, 8, 9, 10 and 14 Section 15 Section 7, 8, 9, 10 and 13 Section 9, 14 |
| 153D | A person who is required to prepare a pollution incident response management plan under this Part must ensure that it is kept at the premises to which the relevant environment protection licence relates, or where the relevant activity | Section 1 |

| | takes place, and is made available in accordance with the | |
|------------|---|------------------------|
| | regulations. | |
| 153E | A person who is required to prepare a pollution incident | Section 11,12 |
| | response management plan under this Part must ensure that | |
| 4525 | it is tested in accordance with the regulations | C |
| 153F | If a pollution incident occurs in the course of an activity so | Section 4, Section 14 |
| | that material harm to the environment (within the meaning | |
| | of section 147) is caused or threatened, the person carrying on the activity must immediately implement any pollution | |
| | incident response management plan in relation to the | |
| | activity required by this Part | |

| | persons who are on the premises or who are present where | |
| | the scheduled activity is being carried on | |
| 98C(1) (k) | A detailed map (or set of maps) showing the location of the | Section 5 |
| | premises to which the licence relates, the surrounding area | |
| | that is likely to be affected by a pollution incident, the | |
| | location of potential pollutants on the premises and the | |
| 000(6) (1) | location of any stormwater drains on the premises | |
| 98C(1) (I) | A detailed description of how any identified risk of harm to | Section 9, Appendix 1 |
| | human health will be reduced, including (as a minimum) by | |
| | means of early warnings, updates and the action to be taken | |
| | during or immediately after a pollution incident to reduce | |
| <u>l</u> | that risk, | 1 |

| 98C(1) (m) | The nature and objectives of any staff training program in relation to the plan | Section 11 |
|------------|--|---------------------------|
| 98C(1) (n) | The dates on which the plan has been tested and the name of the person who carried out the test, | Table7 |
| 98C(1) (o) | The dates on which the plan is updated, | Document Control Sheet |
| 98C(1) (p) | The manner in which the plan is to be tested and maintained. | Section 11, 12, 13 |

3. DEFINITION OF 'POLLUTION INCIDENT'

The definition of a pollution incident is:

"pollution incident means an incident or set of circumstances during or as a consequence of which there is or is likely to be a leak, spill or other escape or deposit of a substance, as a result of which pollution has occurred, is occurring or is likely to occur. It includes an incident or set of circumstances in which a substance has been placed or disposed of on premises, but it does not include an incident or set of circumstances involving only the emission of any noise."

A pollution incident is required to be notified if there is a risk of 'material harm to the environment', which is defined in section 147 of the POEO Act as:

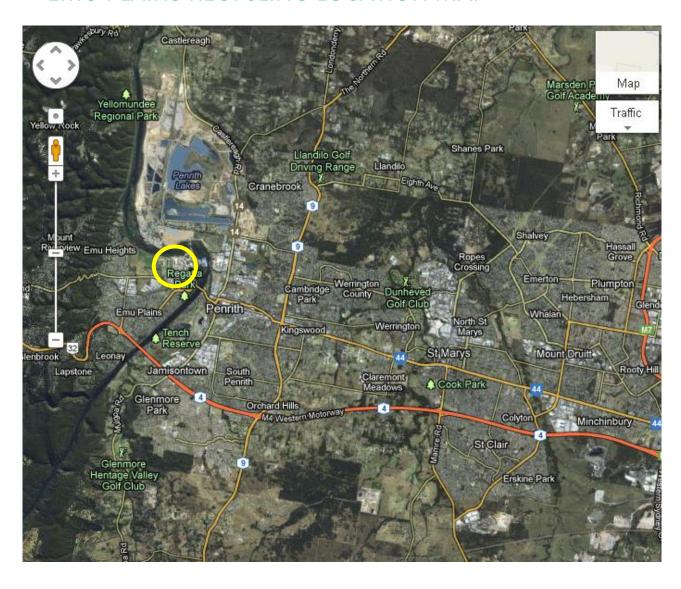

- a) harm to the environment is material if:
 - i. it involves actual or potential harm to the health or safety of human beings or to ecosystems that is not trivial, or
 - ii. it results in actual or potential loss or property damage of an amount, or amounts in aggregate, exceeding \$10,000 (or such other amount as is prescribed by the regulations), and
- b) loss includes the reasonable costs and expenses that would be incurred in taking all reasonable and practicable measures to prevent, mitigate or make good harm to the environment.

Emu Plains Recycling is required to report non-trivial pollution incidents immediately to the EPA, NSW Health, Fire and Rescue NSW, SafeWork NSW and the local council.

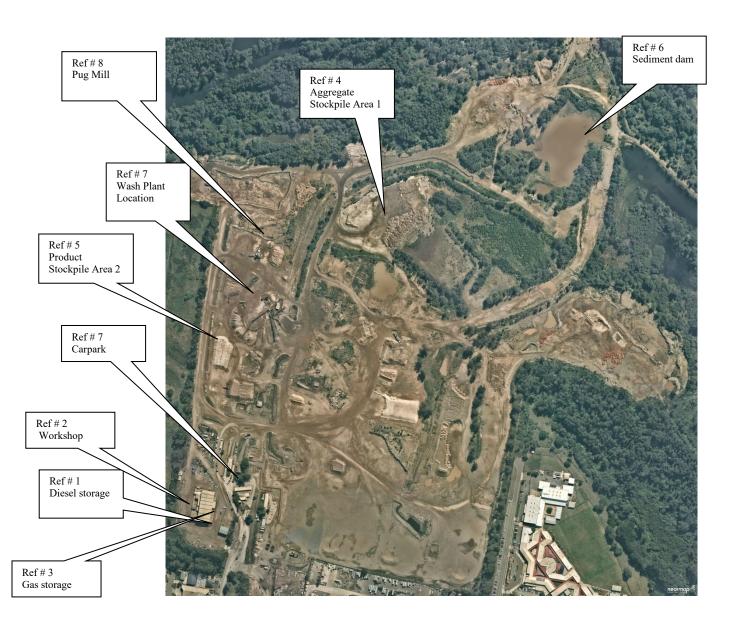

4. SCOPE

This PIRMP must be followed by employees, contractors and visitors of Emu Plains Recycling, to assist in the early response to and reporting of a pollution incident. Emu Plains Recycling is owned and occupied by Boral Resources (NSW) and is operated under Environmental Protection Licence 2062.

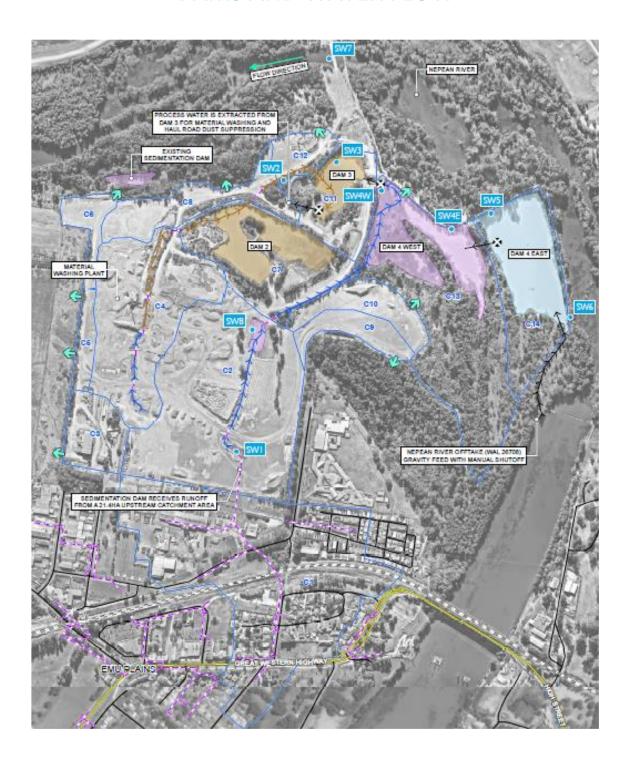

5. SITE LAYOUTEMU PLAINS RECYCLING LOCATION MAP

EMU PLAINS RECYCLING REFERENCE MAP

EMU PLAINS RECYCLING – MAP OF AFFECTED AREAS DAMS AND WATER FLOW

6. POTENTIAL POLLUTING SUBSTANCES

Table 3 below is an inventory of potential pollutants kept on the premises. This inventory provides a description of the main hazards to human health or the environment, an assessment of the likelihood of the hazards occurring and also includes the current controls and safety equipment and/ or pre-emptive actions in place to minimise or prevent risk of harm to human health or the environment

Table 3: Potential Pollutants

| Site Name: Emu Plains Recycling | | | | | | Responsible Person: Site Manager/Supervisor | Date: 01/07/2025 |
|------------------------------------|---|--|---|------------------|---|--|---|
| Name / description | Covered under Hazardous Chemicals/MSDS? | Amount stored | Location of storage | Map reference | Need for early warning ¹ | Current controls | See Risk Ass. & PIRMP Response Action (see Below) |
| CHEMICALS/FU Diesel | Class 3 | Up to 40,000 ltrs (second tank has been shut off) | Diesel Storage Area | Ref No #1 | N/A | Bunding Spill trays PMP Training Spill Kits SOPs Inductions Fire Fighting Equipment Security | Incident #1-3 |
| Oils/Solvents | Class 3 | Packaged goods up to 1,000 ltrs | Oil Storage areas at Workshop and container | Ref No #2 | N/A | Bunding PMP Training Flammable Cabinet Spill Kits Inductions Fire Fighting Equipment Security | Incident #4 |

¹ Early warnings relate to informing neighbours who may be affected by the emission of this substance. If this substance is of a type and quantity which may reach neighbours then early warning assessment of actions is required to be undertaken.

| Gases | Class 2 | N/A | Gas storage cage; Workshop | Ref No #3 and #2 | N/A | Restricted access Fire Extinguishers Concrete Floor Containment Cages and Cabinets Signage | Incident #4 |

| Traffic Areas (dust, chem. leaks & loss) | Class 3 | N/A | Dedicated on site | N/A | N/A | Training SOPs Water cart Spill Kits Traffic management Speed limits | Incident #10 |

² Early warnings relate to informing neighbours who may be affected by the emission of this substance. If this substance is of a type and quantity which may reach neighbours then early warning assessment of actions is required to be undertaken.

7. ROLES AND RESPONSIBILITIES

Table 4 – Roles and Responsibilities

| Position | Responsibility |
|--|--|
| Employees and Contractors | Following the procedures outlined in the PIRMP and related documents |
| | Immediately alerting Supervisor or Team Leader of any environmental incidents or near-misses. |
| Team Leaders / Front Line Supervisors | Following the procedures outlined in the PIRMP and related documents Immediately alerting Site/Recycling Manager or, in case of |
| | their unavailability, Environmental Representative or Environment Manager of any potentially material environmental incidents or near-misses. Conducting incident investigations. |
| Site / Operations Manager and/or Site Environmental Coordinator | Authorisation of the PIRMP Administration, maintenance and implementation of the PIRMP |
| and/or Environment Manager | Assessing whether the incident is non-trivial and has caused or threatens "material environmental harm" and communicate details to management. |
| | Provide direction and advice on incident response |
| | Coordinate communication to neighbours through Stakeholder Relations Manager |
| | Ensuring that investigations are undertaken to a level corresponding to the level of risk and impact. |
| HSE Regional Manager and/or Regional Environment Manager | Make a determination as to whether the incident (as defined in section 147 of the POEO Act) is non-trivial and therefore reportable to external agencies |
| Wanager | Inform Executive General manager and Group management of Notification to External Agencies |
| | Undertake notifications as defined in PIRMP |
| | Authorise notifications to public and/or media following GRP-HSEQ-2-02 |

8. INTERNAL POLLUTION INCIDENT REPORTING

Any pollution incident satisfying the *material harm* threshold must be immediately reported to relevant statutory authorities by either the Site/Operations Manager, or Environment Manager.

In cases where "material harm" level cannot be immediately assessed or insufficient information comes to hand on the severity of the incident, the general advice is to err on the side of caution and notify the Relevant Authorities with a qualification that the situation could not yet be fully assessed.

Until further notice the following procedure needs to be followed:

- When a pollution incident occurs, a person who has become aware of it must immediately bring it to the attention of his/her immediate Supervisor or Manager
- 2. If necessary, first ring "000" for Emergency Services
- 3 At least one of the following BCM personnel must be contacted **immediately**:

Table 5 – Internal Contact Details

| Name | Function | Phone number | Mobile number |
|------|--|--------------|---------------|
| | Site Manager | | |
| | Recycling Manager (NSW/ACT) | | |
| | General Manager - Recycling | | |
| | Environmental Business Partner– NSW/ACT | | |

- 4. Site Manager or in case of his unavailability one of the Senior Management personnel listed above, is to **immediately** notify all Appropriate Regulatory Authorities specified in Section 4.3.
- 5. In borderline situations, where the exceedance of the trigger level of "material harm" of a pollution incident may not be clear, a quick assessment including consultation with

- Boral environmental personnel should be undertaken to help the decision whether to notify or not.
- 6. Boral's Senior Management must be informed promptly of the fact of immediate notification to the Authorities. This includes environmental personnel listed above.

9. EXTERNAL POLLUTION INCIDENT REPORTING

As the legislation requires that notification must be done immediately upon becoming aware of the pollution incident, it is unlikely that a detailed picture will be available for reporting. Notwithstanding, is seems that some of the Government Authorities prepared a detailed questionnaire which is being filled at the time of this initial notification. Under the stress of incident handling it could be easy to provide a hasty, inaccurate estimate of the situation when answering these questions.

Therefore, the notification should be restricted to the facts known and nothing should be assumed or guessed. The details will be provided to the asking Authority later when more information comes to hand.

The initial notification should include as much of the following information (if known) as possible:

- Location and time of the pollution incident
- Type of the incident (spill, fire, unlicensed harmful discharge, etc)
- Assessed level of incident gravity: "it seems to be..." (e.g. "a relatively minor spill";
 "major fire", "explosion limited to one building", etc.)
- Whether the Emergency Services have been required to attend.

Unless known for a fact, the answers to other questions should be politely deferred until a better assessment of the situation can be made.

The Boral person who is responsible for notifying the Authorities (NSW HSE Regional Manager or Regional Environment Manager) about the incident must prepare a Notification Log (a suitable form is attached) with the details of time of notifications and the persons who took to the call. The Authorities will generally provide an Incident Notification Number.

Notification of all Appropriate Government Authorities (at least 5 entities) may take considerable time. Delays may be experienced connecting to the right person or no contact may be possible after hours. All such instances should be recorded in the Notification Log.

10. POLLUTION INCIDENT AUTHORITY CONTACT LIST

Table 6: External Authority Contact List

| Government Authority - compulsory notifications | Emergency notification phone number |
|--|---|
| EPA – Environment Line | 131 555 |
| Fire and Rescue NSW (FRNSW) (Only if haven't already called '000') | 1300 729 579 |
| Penrith City Council | 4732 7777 |
| Public Health Unit (Penrith) – Sydney West AHS | HealthLink (24 hr): 1800 063 635 Head Office- Penrith: 4734 2022 |
| SafeWork Authority of NSW | 131050 Company ABN if asked: 51 000 187 002 |
| Government Authority - ring if relevant | Emergency notification phone number |
| Police & Ambulance | 000 |
| Roads and Maritime Services (road spills) | 132 701 |
| NSW Office of Water | 8838 7885 |
| Bush Fire Control Officer | 1800 049 933 |
| Poisons Information Centre | 131 126 |
| Endeavour Energy (power line emergencies) | 13 10 03 |
| Neighbours and Community – ring if relevant | Phone number |
| Emu Plains Correctional Centre | (02) 4735 0200 |
| Coffey Engineering Group | (02) 4761 8000 |
| Mccarthy Catholic College | (02) 8886 9500 |
| LUTUM Roofing | (02) 4728 8888 |

| Ample Air | (02) 9623 7744 |
|-------------------------|----------------|
| Penola Catholic College | (02) 8886 9500 |

Communication with the local community may also be undertaken depending on the circumstances of the pollution incident. Emu Plains Recycling would consider the following options for providing Early Warning and ongoing information to the community on pollution incidents:

- Direct phone contact with any local residents directly impacted by the pollution incident
- Letter Box drops of incident information and site contacts to local residents impacted by the pollution incident

The Stakeholder Relations Manager can assist in the process of communicating with the community, as per the Stakeholder Engagement Plan for the site.

11. INCIDENT RESPONSE TRAINING

Emu Plains Recycling will implement the Pollution Incident Response Management Plan by training or providing information to relevant employees and contractors in relevant areas of the Plan.

The nature and objectives of staff training is to relate to site personnel the importance of early notification of any incidents and spills to site supervisors and key personnel.

Training or information will be provided on the following;

- The contents and intent of this PIRMP,
- The roles and responsibilities of site staff in relation to this PIRMP
- Spill response procedures;
- General environmental awareness; and / or
- Hazardous materials awareness.

Site inductions for visitors and sub-contractors also advise individuals to report any environmental incidents or spills to site supervisors and key personnel immediately. Key site personnel and supervisors participate in PIRMP Tests which are used as practical training and can also be used to identify any potential gaps or areas for improvement for the PIRMP. A summary of the PIRMP Drills undertaken at Seven Hills Asphalt is shown below in Table 6.

Table 7: PIRMP Drills Undertaken at Emu Plains Recycling

| Test Date | Version tested | Incident Drilled | Drill Team Lead |
|-----------------|----------------|--|-----------------|
| 12 June 2021 | Version 12 | | |
| 2 June 2022 | Version 14 | Incident #4 Oil spill at service area | |
| 19 May 2023 | Version 7 | Incident #8 Hydraulic fluid spill at stockpile | |
| 10 May 2024 | Version 12 | Incident #6 Flood causing overflow or catastrophic failure | |
| 16 May 2025 | Version 17 | Incident #4: Oli spill at service area | |

A sign-off sheet is kept of the personnel present for the undertaking of a PIRMP Drill and a record is kept on when and how the PIRMP is communicated to employees. This information forms a section of the PIRMP Drill document. For more information regarding each of the PIRMP Drills, refer to the specific drill document.

12. PIRMP TESTING

Plans must be tested routinely at least once every 12 months. The testing is to be carried out in such a manner as to ensure that the information included in the plan is accurate and up to date, and that each plan is capable of being implemented in a workable and effective manner.

The objectives of an audit are to maintain compliance with this plan. Internal audits of this Plan will be undertaken every 3 years.

Routine testing of the PIRMP will be conducted annually, and can be completed through the following methods:

- Simulated environmental emergency; or
- Desktop simulations.

13. PIRMP REVIEW

Revisions are to be coordinated by the Site Manager and Environmental Representative.

The objectives of a review are:

- To maintain compliance with the statutory requirements, and
- To identify opportunities for improvement in the Plan, and reduce the risk to human health and the environment

13.1. EVENT BASED

Events which may trigger a review of this Plan or its associated documents include:

- Within 1 month of reporting to the nominated parties in accordance with the plan, after a pollution incident, or
- Modification/Improvement to the system

13.2. TIME BASED

Emu Plains Recycling will review this management plan routinely every 12 months. The Plan review will include:

- This Document, and
- Legislation, Approval and Licence changes.

APPENDIX 1 - RISK ASSESSMENT on POTENTIAL IMPACTS

| | 1 | Hazard | and Li | kelihoo | od Risk Ass | sessment and Corrective Control Measures | | |
|------------------------------------|---|-----------------|----------------|---------|--------------------------------------|---|--------------------------------|------------------|
| Site: | | | | | ponsible F | | | |
| Emu Plair | s Recycling | | | Site | Site Manager/Supervisor 14 June 2025 | | | |
| Name / ref of pollutant/ chemicals | Description of Hazard / Incident leading to hazard | Conseq uence | Likeli hood | Risk | Impact on neighbours ³ | Control Measures Corrective Action Coverage under other Plans | | Action date |
| Diesel | Incident #1 Catastrophic failure of above ground diesel tanks resulting in diesel escaping from bunded area, causing material harm to the environment | 1 | 1 | L1 | N/A | Consequence: (minor): Failure resulting in loss of all or substantial volume of tanks would be captured entirely by existing primary bund with no release to soil or water. Likelihood: (unlikely): Tanks are kept within a large bund with concrete walls. Due to location of tank damage to tanks is unlikely to occur from external equipment. In addition tanks are maintained in good structural integrity with low risk of failure through corrosion. | As per PIRMP action plan | When required |
| | Incident #2 Loss of diesel outside bund during refuelling/fuelling operations resulting in material harm to the environment. | 1 | 2 | L2 | N/A | Consequence: (minor): Failure resulting in loss/leakage from fuelling or refuelling from hose, nozzle or plant/equipment would be captured by a self bunded fill point or spill kill with minimal release to soil. Likelihood: (likely): Due to location within the tank structure an incident while re-fuelling and fuelling is likely to occur on some occasions. Hoses and refuelling equipment are maintained with low risk of failure. All mobile plant refuel on a contained concrete pad with a sump, and the spill trays are used at the tanker transfer points. | As per PIRMP action plan | When required |

³ If the incident may impact on neighbours then it will need to trigger the early warnings assessment and actions

| | Incident #3 Significant loss of fuel from fuel cart during refilling mobile equipment causing material harm to the environment | 2 | 3 | М3 | N/A | Consequence: (Minor): Failure resulting in loss of all or substantial volume of tanks would be contained to small area of site, with equipment located away from water courses. Likelihood: (Unlikely): Tank, hoses and refuelling equipment are maintained in good condition. Equipment is inspected during pre-start any all faults or concerns raised. | As per PIRMP action plan | When required |
|-----------------------|--|---|---|----|-----|--|--------------------------------|------------------|
| Oils/Solvents | Incident #4 Loss of oils solvents inside bund during delivery and or use causing material harm to the environment | 1 | 1 | L1 | N/A | Consequence: (minor): Failure resulting in loss of oils/solvents from packaged goods would be captured entirely by existing primary bund with no release to soil or water. Likelihood: (unlikely): Due to location within the bund, spillage during delivery and use is unlikely to occur. In addition hoses and decanting equipment are maintained in good structural integrity with low risk of failure. | As per PIRMP action plan | When required |
| Product stockpiles | Incident #5. Excessive airborne dust from stockpiled material causing material harm to the environment or significant impact to community | 1 | 3 | M3 | Y | Consequence: (minor): Excessive dust from stockpile during high winds causing nuisance to surrounding area. Stockpiles are maintained to a manageable level. Use of water cart onsite during windy periods. No sensitive neighbours are adjacent to plant area. Likelihood: (highly likely): Airborne dust from high winds is likely to occur at some time. On site water cart is used to wet down stockpiles on high risk days. | As per PIRMP action plan | When required |
| Sediment Dams | Incident #6 Flood causing overflow or catastrophic failure of one or more sediment dams releasing large volumes of water into on-site and off- site water courses (i.e creek). | 2 | 1 | L2 | N/A | Consequence: (moderate): Flood event causing overflow or catastrophic failure of one or more sediment dams are likely to result in off-site impacts to water courses which would predominantly reduce water quality over a short period of time. As such, impact to the environment/human health is not considered to be significant. Likelihood: (unlikely): Dams are frequently monitored and inspected for levels and integrity. Note: For PIRMP purposes overflow events (excluding flood overflows) during extreme wet weather will be reported under POEO Licence obligations and not Immediate Reporting. | As per PIRMP action plan | When required |

| Mahila Dlavet | Incident #7 | 4 | 4 | 14 | NI. | When flooding occurs as a consequence of the Nepean River inundating the site, the PIRMP will not be activated unless flooding impacts trigger material environment harm. | Ac ::-2" | M/b s s |
|---|--|---|---|----|-----|---|--------------------------------|------------------|
| Mobile Plant | Mobile plant, hydraulic hose or fuel tank failure causing material harm to the environment | 1 | 1 | L1 | N | Consequence: (minor): Failure from fuel tank or hydraulic hoses would be maintain to a small localised area on site. Likelihood: (unlikely): Hose or fuel tank failure from mobile plant would be minimal as prestart and regular maintenance programs are in place to capture and prevent such occurrences. Spills kits also maintain and available in various areas. | As per PIRMP action plan | When required |
| Mobile plant/ Contractor, Visitor | Incident #8 Mobile plant, hydraulic hose or fuel tank failure causing material harm to the environment | 1 | 1 | L1 | N | Consequence: (minor): Failure from fuel tank or hydraulic hoses would be maintain to a small localised area on site. Likelihood: (unlikely): Hose or fuel tank failure from mobile plant would be minimal as prestart and regular maintenance programs are in place to capture and prevent such occurrences. Spills kits also maintain and available in various areas. Inductions for all contractors demonstrating their accountabilities and responsibilities for reporting environmental incidents. | As per PIRMP action plan | When required |
| Car Park | Incident #9 Ruptured fuel tank causing material harm to the environment | 1 | 1 | L1 | N | Consequence: (minor): Failure from fuel tank or hydraulic hoses would be maintain to a small localised area on site. Likelihood: (unlikely): Hose or fuel tank failure from employee or visitor car would be minimal. Car park area is fully sealed. Spill kits also maintain and available in various areas | As per PIRMP action plan | When required |
| Traffic areas (dust) | Incident # 10 Dust from mobile plant causing material harm to the environment or significant impact to community | 1 | 2 | L2 | Y | Consequence: (minor): Minor dust is created form the continuous mobile plant operations across the site. No sensitive neighbours. Likelihood: (likely): Main trafficable areas watered with water cart in high wind conditions. | As per PIRMP action plan | When required |
