BORAL

Permeable concrete

Boral PermCon™

AUSTRALIAN MADE AND OWNED

boral.com.au/permcon

Smarter pavements.
Better stormwater management.

Boral PermCon™ is a structural permeable concrete solution designed to allow rainfall to pass through the surface and into a designed drainage, treatment or infiltration profile below. By managing water where it falls, Boral PermCon™ helps reduce stormwater runoff, support groundwater recharge and contribute to Water Sensitive Urban Design (WSUD) outcomes.

Why choose Boral PermCon™?

	**Maximise usable land**	Reduce reliance on traditional drainage and retention structures by integrating water management into the pavement itself.
	**Support sustainable design outcomes**	Contribute to greener, more resilient developments while supporting healthy urban environments.
	**Manage stormwater at the source**	Reduce stormwater runoff and peak flows while supporting natural groundwater recharge.
	**Improve water quality**	Help filter pollutants before they enter rivers, streams and waterways.

Key project benefits

Up to 70%
faster installation

Compared to segmental permeable paving systems.

Up to 40%
cost savings

Potential project savings compared with permeable paving systems.

Up to 25MPa
trafficable permeable surface (12 tonnes per axel[1])

Trafficable applications.

[1] Based on 200mm slab thickness

PermCon™ applications

Residential applications

Driveways, patios and garden paths.

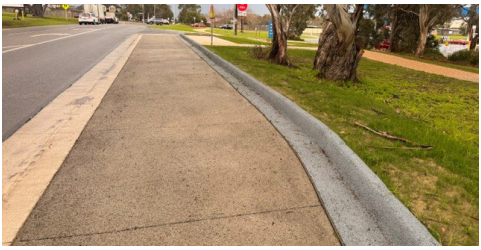

Car parks & hardstands

Commercial car parks, trailer parks and caravan parks.

Footpaths & cycleways

Pedestrian and active transport infrastructure.

Tree protection & urban greening

Tree Protection Zones, landscape projects and sensitive root environments.

Recreation & sporting facilities

Tennis courts, basketball courts and artificial turf foundations.

Stormwater & water storage solutions

Extended water storage applications and projects where integrated stormwater management is a key driver.

A complete permeable concrete solution

Supply & install solution

Australian Permeable Concrete

Boral PermCon™, delivered in partnership with Australian Permeable Concrete (APC), provides a fully managed Supply & Install solution for commercial and residential projects across Australia.

- ✓ Dedicated national team delivering projects throughout Australia
- ✓ Accredited to:
  - **ISO 9001** - Quality Management
  - **ISO 14001** - Environmental Management
  - **ISO 45001** - Health & Safety Management
- ✓ More than 85,000m² of permeable pavement installed
- ✓ 90+ personnel across Australia and New Zealand
- ✓ Installation capability exceeding 500m² per day
- ✓ Proven project delivery experience across Australia

Available in six contemporary colours to complement residential, commercial and public realm projects.
