Concrete Tiles

TECHNICAL DATA SHEET

Striata

Modern concrete tiles are made from sand and cement with a pigmented colour coat. This can replicate the appearance of a broad array of distinctive tile designs, while remaining relatively cost-effective.

Acoustic Performance

The density of tiles helps reduce external sound such as aircraft and road noise and, particularly, rain and hail.

Thermal Performance

Roof tiles can help you enjoy more comfortable living in summer and winter. The thermal mass of concrete materials when used correctly can result in advantageous insulation properties, in addition to considerations such as sarking and overall solar design.

Widest range of colours and profiles

With up to 6 profiles and 13 colours to choose from, there’s a tile that’s just right for your home!

Economical

Our concrete tiles are priced to suit most budgets.

20 Year Warranty*

Concrete tiles are suitable for all environments, including marine and bushfire prone areas.

Specification Notes

Roofing material shall be Boral Concrete Striata SA (Please specify a colour)

Sarking shall be Boral Sarking Extra Heavy Duty
