Promoting sustainable forest management

- Block parquetry is laid individually to create an attractive pattern. Contrasting coloured timber species can be used to create depth in the design.
- Parquetry can be laid with strip flooring or a decorative border to create an interesting feature.
- Boral Parquetry is a great solution for heavy traffic areas such as halls, steps, entrance ways and commercial interiors.
- If a small section is seriously damaged, it can be easily replaced. After years of wear the entire floor can be restored by sanding and refinishing.
- Boral Timber products are AFS Chain of Custody certified providing peace of mind that Boral's parquetry is sourced from sustainably managed and legal forestry.
- Boral Timber has a system that ensures strict tolerances and drying procedures to produce a sound product.
- The Boral Installation Guide, building codes and Australian Standards should be adhered to when installing Boral Parquetry.

Standard sizing
260x65x18mm

HERITAGE

HERRINGBONE

SQUARE ON SQUARE

Note: Variations of colour within a timber species are normal, therefore photographs, samples and displays can only be indicative of the colour range of the timber species nominated. Timber is a natural product and commonly reacts to changes in atmospheric and environmental conditions such as humidity and temperature. This is considered normal.
