Grande' Block Parquetry™

Features and Benefits

- New large format Solid Hardwood blocks: 600mm long x 120mm wide x 18mm thick
- Approximately double the size of our standard parquetry range
- Create a cleaner, contemporary feel while still embodying the aesthetics of heritage architecture
- Can be laid on existing sub-floor surfaces, including concrete slabs, old timber flooring, particle board and plywood

Installation Requirements

It is recommended that parquetry flooring is installed by a professional as it requires specific methodology and equipment. A professional installer will also take acclimatisation into consideration and lay the timber accordingly.

Note: Variations of colour within a timber species are normal, therefore photographs, samples and displays can only be indicative of the colour range of the timber species nominated. Timber is a natural product and commonly reacts to changes in atmospheric and environmental conditions such as humidity and temperature. This is considered normal. It is recommended that species are viewed at a timber showroom before a decision is made on colour.
