Time arrives to have your say!

After more than five years of planning, investigations and seeking input from our various stakeholders, our plans to continue operating our landmark Marulan South Limestone site well into this century are about to be exhibited for public feedback.

Having been lodged with the **NSW Department of Planning and Environment (DPE)** going into the Christmas-New Year period, we've just been advised the application has reached the **exhibition** stage.

From **3 April**, anyone with an interest in our **State Significant Development (SSD)** application proposal will be able to view the documentation and provide their feedback as part of the SSD's assessment.

Simply log onto the DPE's **Major Projects** portal at www.planningportal.nsw.gov.au/major-projects and enter **Marulan South Limestone** into the search function. You can also access this link via our own **Boral Marulan Operations webpage**.

The exhibition will run for a minimum of **28 days**. Of course, as always we are happy to also receive your feedback and questions about the SSD or any aspect to do with the Limestone site.

The SSD seeks:

- Approval to keep operating for a **30 year period**;
- An annual production limit of **four million tonnes**;
- Approval for a mine design which will see the **pit widen** and **deepen** into the limestone resource;
- To permit **up to 600 000 tonnes** per year of material to be transported by road (site to Hume Highway); and
- Approval for **overburden** generated by mining to be used to **backfill** the southern (Bungonia) end of the mine pit, and to create new **emplacements**, one of which will extend over Marulan South Road.

We encourage everyone to have input into the future of this vital resource for our region and wider NSW.

Outward Bound Boral Youth Leadership Program

Boral is once again supporting a number of Year 9 students from local public high schools in the Southern Highlands and Tablelands to attend a **Youth Leadership Outward Bound** program in early May. Details can be obtained through each of the School's Year advisors.

University students visit

On 21 March, Marulan South Limestone played host to 70 **University of NSW Civil and Mining undergraduate students**. This annual event allows the students to see an operating mine up close.

Women in Quarrying Conference

During February, a number of both male and female Boral staff attended the Institute of Quarrying Australia's **Women in Quarrying Conference**.

Over **150** people attended the one day conference in Sydney and become **Champions of Change** in driving diversity within our quarry businesses. Our Boral Marulan South Operations already have a number of women in mobile and fixed plant operator roles, as well as trade positions, both employed by Boral and onsite contractors.

Over 2019, we will be endeavouring to encourage yet more women to apply for roles, demonstrating quarrying as a work place choice for them as well.
