PART A: COMPLIANCE REQUIREMENTS, POLLUTION INVENTORIES AND RISK ASSESSMENTS

1. PURPOSE

The purpose of the Prestons Cement Pollution Incident Response Plan is to:

- Provide direction to the staff at Prestons Cement in responding to pollution incidents at the Prestons operations;
- Ensure timely communication about a pollution incident is provided to staff at the premises, the Environment Protection Authority (EPA), other relevant authorities specified in the Protection of the Environment Legislation Amendment Act (POELA Act) (including Liverpool City Council, NSW Ministry of Health, Work Cover NSW, and Fire and Rescue NSW) and persons outside the operations who may be affected by the impacts of a pollution incident;
- Minimise and control the risk of a pollution incident at Prestons Cement by identifying key risks and planned actions to minimise and manage those risks;
- Detail the training requirements for this plan, identifying persons responsible for implementing it, and ensuring that the plan is regularly tested for accuracy, currency and suitability.
- A hard copy of the PIRMP is to be kept on the site environmental board in the Prestons Dispatch Office. A soft copy of the PIRMP is made available online <https://www.boral.com.au/our-commitment/environmental-reporting>.

2. LEGISLATIVE REQUIREMENTS

The specific requirements for a Pollution Incident Response Management Plan (PIRMP) are set out in Part 5.7A of the POEO Act and the Protection of the Environment Operations (General) Regulation 2009 (POEO (G) Regulation). Part 3A of the POEO Act and the Protection of the Environment Operations (General) Regulation 2009 (POEO (G) Regulation) describes specific components and requirements of a PIRMP.

Table 2 summarises the location of these requirements within the document.

Table 2: Summary of Legislative Requirements of a PIRMP

Section/Clause	Requirement	Location in PIRMP
Part 5.7A POEO Act 1997		
147	<p>(1) For the purposes of this Part—</p> <p style="padding-left: 40px;">(a) harm to the environment is material if—</p> <p style="padding-left: 80px;">(i) it involves actual or potential harm to the health or safety of human beings or to ecosystems that is not trivial, or</p> <p style="padding-left: 80px;">(ii) it results in actual or potential loss or property damage of an amount, or amounts in aggregate, exceeding \$10,000 (or such other amount as is prescribed by the regulations), and</p> <p style="padding-left: 40px;">(b) loss includes the reasonable costs and expenses that would be incurred in taking all reasonable and practicable measures to prevent, mitigate or make good harm to the environment.</p> <p>(2) For the purposes of this Part, it does not matter that harm to the environment is caused only in the premises where the pollution incident occurs.</p>	Section 3
153A	The holder of an environment protection licence must prepare a pollution incident response management plan that complies with this Part in relation to the activity to which the licence relates.	EPL 20836 and this document
153C	<p>A pollution incident response management plan must be in the form required by the regulations and must include the following—</p> <p>(a) the procedures to be followed by the holder of the relevant environment protection licence, or the occupier of the relevant premises, in notifying a pollution incident to—</p> <p style="padding-left: 40px;">(i) the owners or occupiers of premises in the vicinity of the premises to which the environment protection licence or the direction under section 153B relates, and</p> <p style="padding-left: 40px;">(ii) the local authority for the area in which the premises to which the environment protection licence or the direction under section 153B relates are located and any area affected, or potentially affected, by the pollution, and</p> <p style="padding-left: 40px;">(iii) any persons or authorities required to be notified by Part 5.7,</p>	<p>Section 7 and 8</p> <p>Section 4</p> <p>Section 6, 7, 8, 9 and 14</p> <p>Section 6, 7, 8, 9 and 14</p>

	(b) a detailed description of the action to be taken, immediately after a pollution incident, by the holder of the relevant environment protection licence, or the occupier of the relevant premises, to reduce or control any pollution, (c) the procedures to be followed for coordinating, with the authorities or persons that have been notified, any action taken in combating the pollution caused by the incident and, in particular, the persons through whom all communications are to be made, (d) any other matter required by the regulations.	Section 13 Section 6, 7, 8, 9 and 14 Section 8, 13
153D	A person who is required to prepare a pollution incident response management plan under this Part must ensure that it is kept at the premises to which the relevant environment protection licence relates, or where the relevant activity takes place, and is made available in accordance with the regulations.	Section 1
153E	A person who is required to prepare a pollution incident response management plan under this Part must ensure that it is tested in accordance with the regulations	Section 10,11
153F	If a pollution incident occurs in the course of an activity so that material harm to the environment (within the meaning of section 147) is caused or threatened, the person carrying on the activity must immediately implement any pollution incident response management plan in relation to the activity required by this Part	Section 3, Section 13
Part 3A POEO(G) Regulation 2009 Pollution Incident Response Management Plans note: See also 153C (a)-(c) of the POEO Act 1997		
98C(1) (a)	A description of the hazards to human health or the environment associated with the activity to which the licence relates,	Section 5, Appendix 1
98C(1) (b)	The likelihood of any such hazards occurring, including details of any conditions or events that could, or would, increase that likelihood,	Appendix 1
98C(1) (c)	Details of the pre-emptive action to be taken to minimise or prevent any risk of harm to human health or the environment arising out of the relevant activity	Section 8, Appendix 1, Section 13
98C(1) (d)	An inventory of potential pollutants on the premises or used in carrying out the relevant activity	Section 5
98C(1) (f)	A description of the safety equipment or other devices that are used to minimise the risks to human health or the environment and to contain or control a pollution incident,	Section 5, Appendix 1
98C(1) (g)	the names, positions and 24-hour contact details of those key individuals who: I. are responsible for activating the plan, and II. are authorised to notify relevant authorities under section 148 of the Act, and III. are responsible for managing the response to a pollution incident,	Section 7, 14
98C(1) (h)	the contact details of each relevant authority referred to in section 148 of the Act,	Section 8, 14
98C(1) (i)	Details of the mechanisms for providing early warnings and regular updates to the owners and occupiers of premises in	Section 9

	the vicinity of the premises to which the licence relates or where the scheduled activity is carried on	
98C(1) (j)	The arrangements for minimising the risk of harm to any persons who are on the premises or who are present where the scheduled activity is being carried on	Section 8, Appendix 1
98C(1) (k)	A detailed map (or set of maps) showing the location of the premises to which the licence relates, the surrounding area that is likely to be affected by a pollution incident, the location of potential pollutants on the premises and the location of any stormwater drains on the premises	Figure 1-3
98C(1) (l)	A detailed description of how any identified risk of harm to human health will be reduced, including (as a minimum) by means of early warnings, updates and the action to be taken during or immediately after a pollution incident to reduce that risk,	Section 8, Appendix 1
98C(1) (m)	The nature and objectives of any staff training program in relation to the plan	Section 10
98C(1) (n)	The dates on which the plan has been tested and the name of the person who carried out the test,	Table 6
98C(1) (o)	The dates on which the plan is updated,	Document Control Sheet
98C(1) (p)	The manner in which the plan is to be tested and maintained.	Section 10, 11, 12

3. DEFINITION OF ‘POLLUTION INCIDENT’

The definition of a pollution incident is:

“Pollution incident means an incident or set of circumstances during or as a consequence of which there is or is likely to be a leak, spill or other escape or deposit of a substance, as a result of which pollution has occurred, is occurring or is likely to occur. It includes an incident or set of circumstances in which a substance has been placed or disposed of on premises, but it does not include an incident or set of circumstances involving only the emission of any noise.”

A pollution incident is required to be notified if there is a risk of ‘material harm to the environment’, which is defined in section 147 of the POEO Act as:

a) Harm to the environment is material if:

- i. it involves actual or potential harm to the health or safety of human beings or to ecosystems that is not trivial, or

ii. it results in actual or potential loss or property damage of an amount, or amounts in aggregate, exceeding \$10,000 (or such other amount as is prescribed by the regulations), and

b) loss includes the reasonable costs and expenses that would be incurred in taking all reasonable and practicable measures to prevent, mitigate or make good harm to the environment.

Licensees are now required to report **non-trivial** pollution incidents immediately to the EPA, NSW Health, Fire and Rescue NSW, Safework NSW and the local council.

4. SCOPE

This PIRMP must be followed by employees, contractors and visitors of Prestons Cement, to assist in the early response to and reporting of a pollution incident. Prestons Cement is owned and occupied by Boral Cement Limited and is operated under Environmental Protection Licence 20836.

5. SITE LAYOUT

The location of the site and overall site layout is shown in Figure 1 and Figure 2 below, respectively. Please note that Part B of this PIRMP contains detailed maps which describe the important details for each pollution incident scenario.

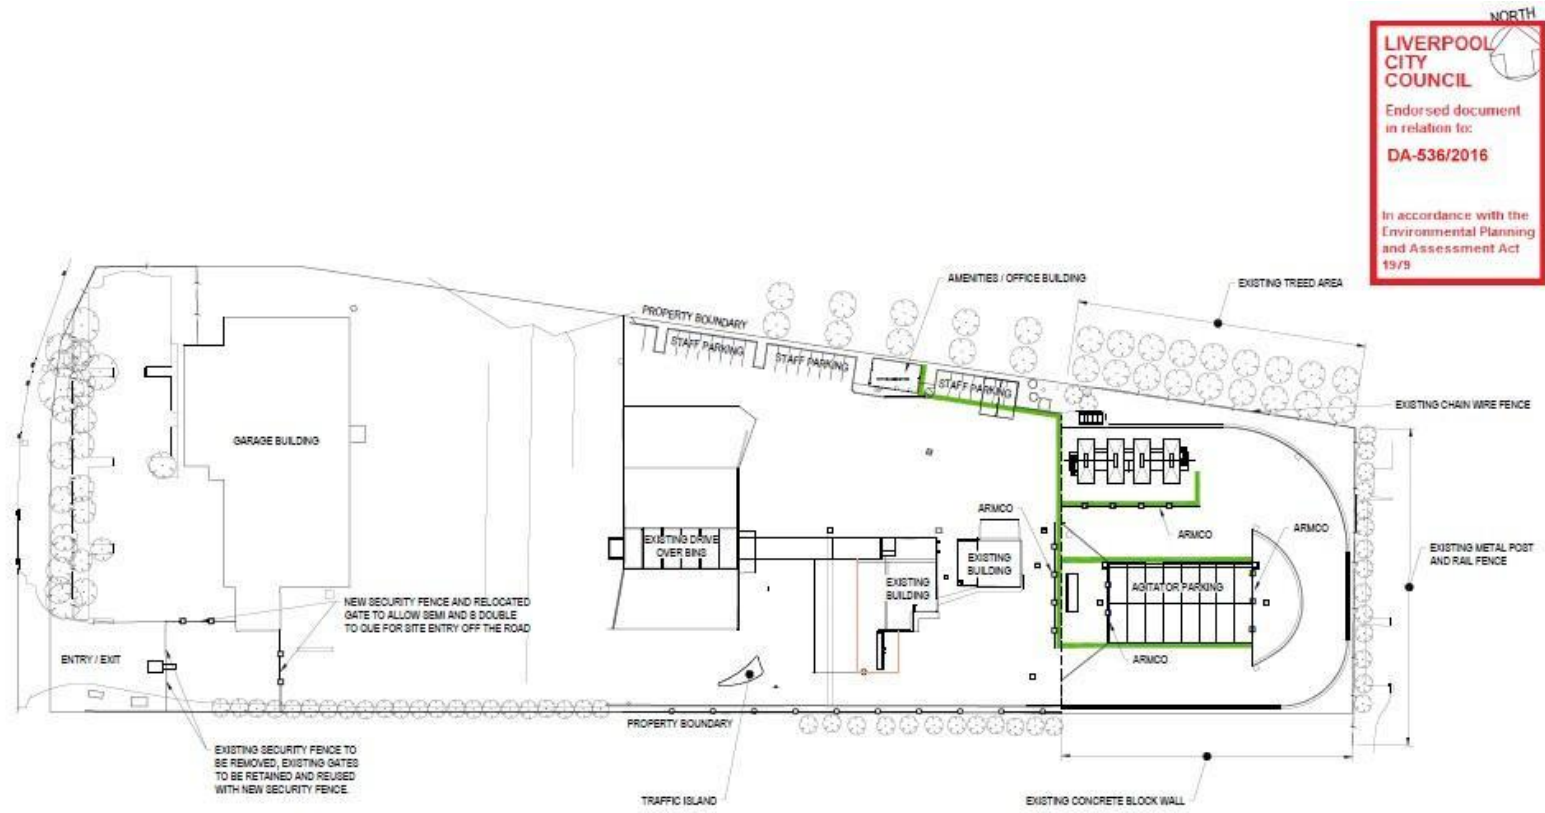

FIGURE 1: PRESTONS CEMENT LOCATION MAP

FIGURE 2: PRESTONS CEMENT REFERENCE MAP

FIGURE 3: PRESTONS CEMENT – SITE COMPONENTS

6. POTENTIAL POLLUTING SUBSTANCES

Table 3 below is an inventory of potential pollutants kept on the premises. This inventory provides a description of the main hazards to human health or the environment, an assessment of the likelihood of the hazards occurring and also includes the current controls and safety equipment and/ or pre-emptive actions in place to minimise or prevent risk of harm to human health or the environment.

LIST OF POLLUTING SUBSTANCE STORAGES/USES AT SITE: INITIAL ASSESSMENT (all Chemicals listed in this sheet are to be subjected to a risk assessment)							
Site Name: Prestons Cement						Responsible Person: Matt Paulic	Date: 06/10/2020
Name / description	Covered under Haz Chemicals/SDS?	Amount stored	Location of storage	Map reference	Need for early warning ¹	Current controls	See Risk Ass & PIRMP Response Action (see Below)
CHEMICALS/FUELS/LUBRICANTS (raw materials and products which can cause pollution)							

¹ Early warnings relate to informing neighbours who may be affected by the emission of this substance. If this substance is of a type and quantity which may reach neighbours then early warning assessment of actions is required to be undertaken.

Oils/Solvents	N/A	TBC		Ref No #2	N/A	<ul style="list-style-type: none"> • Bunding PMP • Training • Spill Kits • Inductions • Fire Fighting Equipment • Security 	Incident #1
MATERIALS (e.g. stockpiles, silos, bulk solids etc.)							
Fly Ash Silos	N/A	Variable	Dedicated on site	Ref No #2	Yes	<ul style="list-style-type: none"> • Four Silos • Dust collectors • High level alarms • Overflow directed to ground • Maintain manageable levels • Security 	Incident #2
AQUEOUS (e.g. dams, wastewater tanks, other water storage area)							
						•	
SUBSTANCES IN PROCESSES (substances which could be emitted from operational process i.e. treatment plants, vehicles etc.)							
Name / description	Covered under Haz Chemicals/MSDS?	Amount stored	Location of storage	Map reference	Need for early warning²	Current controls	See Risk Ass & PIRMP Response Action (see Below)
Mobile Plant (BORAL CONCRETE)	Class 3	FELs	Variable Locations	N/A	N/A	<ul style="list-style-type: none"> • Spill Kits • Pre start checks • PMP • Training 	Incident #1

² Early warnings relate to informing neighbours who may be affected by the emission of this substance. If this substance is of a type and quantity which may reach neighbours then early warning assessment of actions is required to be undertaken.

Traffic Areas (dust, chem. leaks & loss)	N/A	N/A	Dedicated on site	N/A	N/A	<ul style="list-style-type: none"> • Training • Water cart • Spill Kits 	Incident #1
--	-----	-----	-------------------	-----	-----	--	-------------

Table 3: Summary and controls relating to potential polluting substances

7. ROLES AND RESPONSIBILITIES

Position	Responsibility
<i>Employees and Contractors</i>	<p>Following the procedures outlined in the PIRMP and related documents</p> <p>Immediately alerting Site Manager or Team Leader of any environmental incidents or near-misses.</p>
<i>Team Leaders / Front Line Supervisors</i>	<p>Following the procedures outlined in the PIRMP and related documents (HSEQ MS 3-02)</p> <p>Immediately alerting Site Manager or, in case of their unavailability, Environmental Representative or Environment Manager of any potentially material environmental incidents or near-misses.</p> <p>Assist in conducting incident investigations.</p>
<i>Site Manager and/or Site Environmental Advisor and/or Environment Manager</i>	<p>Authorisation of the PIRMP</p> <p>Administration, maintenance and implementation of the PIRMP</p> <p>Assessing whether the incident is non-trivial and has caused or threatens “material environmental harm” and communicate details to management.</p> <p>Provide direction and advice on incident response</p> <p>Coordinate communication to neighbours through Stakeholder Relations Manager</p> <p>Ensuring that investigations are undertaken to a level corresponding to the level of risk and impact.</p>
<i>HSE Regional Manager and/or Regional Environment Manager</i>	<p>Make a determination as to whether the incident (as defined in section 147 of the POEO Act) is non-trivial and therefore reportable to external agencies</p> <p>Inform Executive General manager and Group management of Notification to External Agencies</p> <p>Undertake notifications as defined in PIRMP</p> <p>Authorise notifications to public and/or media following GRP-HSEQ-2-02</p>

8. INTERNAL POLLUTION INCIDENT REPORTING

Any pollution incident satisfying the **material harm** threshold must be immediately reported to relevant statutory authorities by either the HSE Regional Manager, or Regional Environment Manager.

In cases where “material harm” level cannot be immediately assessed or insufficient information comes to hand on the severity of the incident, the general advice is to err on the side of caution and notify the Relevant Authorities with a qualification that the situation could not yet be fully assessed.

Until further notice the following procedure needs to be followed:

1. When a pollution incident occurs, a person who has become aware of it must immediately bring it to the attention of his/her immediate Supervisor or Manager
2. If necessary, first ring “000” for Emergency Services
3. At least one of the following BCM personnel must be contacted **immediately**:

Whilst personal contact details for the following are available in the Controlled on site Pollution Incident Response Management Plan they do not appear in this public document.

Table 4: Internal contact list

Name	Function	Mobile number
	Operations Manager - Cement	
	Operations Supervisor	
	Production Manager – Concrete (Sydney West)	
	Environmental Sustainability Manager - Cement	
	Construction Materials Environmental Manager NSW/ACT	

4. The Preston Cement Operations Supervisor, or in case of his unavailability one of the Senior Management personnel listed above, is to **immediately** notify the Boral Cement Environmental Sustainability Manager or the NSW or Regional Environment Manager.

5. NSW Environmental Sustainability Manager to immediately notify all Appropriate Regulatory Authorities specified in Section 8.
6. In borderline situations, where the exceedance of the trigger level of “material harm” of a pollution incident may not be clear, a quick assessment including consultation with Boral environmental personnel should be undertaken to help the decision whether to notify or not.
7. Boral’s Senior Management must be informed promptly of the fact of immediate notification to the Authorities. This includes environmental personnel listed above, as well as the Logistics GM and Cement EGM.

9. EXTERNAL POLLUTION INCIDENT REPORTING

As the legislation requires that notification must be done immediately upon becoming aware of the pollution incident, it is unlikely that a detailed picture will be available for reporting.

Notwithstanding, it seems that some of the Government Authorities prepared a detailed questionnaire, which is being filled at the time of this initial notification. Under the stress of incident handling it could be easy to provide a hasty, inaccurate estimate of the situation when answering these questions.

Therefore, the notification should be restricted to the facts known and nothing should be assumed or guessed. The details will be provided to the asking Authority later when more information comes to hand.

The initial notification should include as much of the following information (if known) as possible:

- Location and time of the pollution incident
- Type of the incident (spill, fire, unlicensed harmful discharge, etc)
- Assessed level of incident gravity: “it seems to be...” (e.g. “a relatively minor spill”; “major fire”, “explosion limited to one building”, etc.)
- Whether the Emergency Services have been required to attend.

Unless known for a fact, the answers to other questions should be politely deferred until a better assessment of the situation can be made.

The Boral person who is responsible for notifying the Authorities (Environmental Sustainability Manager or Regional Environment Manager) about the incident as per the contact details in Table 5, must prepare a Notification Log (a suitable form is attached in Section 14) with the details of time of notifications and the persons who took to the call. The Authorities will generally provide an Incident Notification Number.

Notification of all Appropriate Government Authorities (at least 5 entities) may take considerable time. Delays may be experienced connecting to the right person or no contact may be possible after hours. All such instances should be recorded in the Notification Log.

In case of pollution incidents that may potentially pose threat to the health and safety of the neighbours (e.g. toxic fumes, fire, fuel spill into the street, release of a thick dust cloud, etc.), the neighbours must also be urgently notified.

The early warning of the neighbourhood notification will be undertaken by site staff by phone. The current contact list for neighbours is attached in Appendix B. The initial notification should be brief and contain only a description of the environmental threat together with instructions what to do. For example:

- Due to a dust collector's failure in the bag shed, we are experiencing elevated dust emissions from the site. Please keep your doors and windows closed until further notice.
- An accidental trade effluent discharge occurred from the site to a local creek. Please refrain from recreational use of the area until testing confirms that the water is safe.
- Due to a diesel spillage onto a street from the site, a clean-up operation is being organised. Please be watchful for road closures in relation to this operation.

A follow up information on the resolution of emergency situation would be timely conducted on the phone.

10. POLLUTION INCIDENT AUTHORITY CONTACT LIST

Table 5: External Authority Contact List

Government Authority - compulsory notifications	Emergency notification phone number
EPA – Environment Line	131 555
Fire and Rescue NSW (FRNSW)	1300 729 579
Liverpool City Council	1300 362 170
Public Health Unit - Liverpool	02 8778 0855 Ask for Public Health Officer on call
SafeWork NSW	13 10 50 Company ABN if asked: 62 008 528 523
Government Authority - ring if relevant	Emergency notification phone number
Police & Ambulance	000
Roads and Maritime Services (road spills)	132 701
Poisons Information Centre	131 126
Endeavour Energy (power emergencies)	131 003

Communication with the local community may also be undertaken depending on the circumstances of the pollution incident. Part B describes in the response action tables the criteria whether an incident may require community notification. If deemed necessary, Prestons Cement would consider the following options for providing Early Warning and ongoing information to the community on pollution incidents:

- Direct phone contact with any local residents directly impacted by the pollution incident
- Letter Box drops of incident information and site contacts to local residents impacted by the pollution incident

NEIGHBOURS	ADDRESS	EMERGENCY NOTIFICATION PHONE NUMBER
Pie Face BP Service Station	14 Bernera Rd, Prestons NSW 2170	

BP Service Station	14 Bernera Rd, Prestons NSW 2170	
Aldi	10-12 Bernera Rd, Prestons NSW 2170	

The Stakeholder Relations Manager can assist in the process of communicating with the community, as per the Stakeholder Engagement Plan for the site.

11. INCIDENT RESPONSE TRAINING

Prestons Cement will implement the Pollution Incident Response Management Plan by training or providing information to relevant employees and contractors in relevant areas of the Plan. The nature and objectives of staff training is to relate to site personnel the importance of early notification of any incidents and spills to site supervisors and key personnel.

Training or information will be provided on the following:

- The contents and intent of this PIRMP;
- The roles and responsibilities of site staff in relation to this PIRMP;
- Spill response procedures;
- General environmental awareness; and / or
- Hazardous materials awareness.

Site inductions for visitors and sub-contractors also advise individuals to report any environmental incidents or spills to site supervisors and key personnel immediately. Key site personnel and supervisors participate in PIRMP Tests which are used as practical training and can also be used to identify any potential gaps or areas for improvement for the PIRMP. A summary of the PIRMP Drills undertaken at Prestons Cement is shown below in Table 6.

Table 6: PIRMP Drills Undertaken at Prestons

Test Date	Version tested	Incident Drilled	Drill Team Lead
14/10/21	5	Fly Ash Spill	

Prestons Cement – PIRMP_V5

2/10/2020	4	Fly Ash Spill	
14/05/2019	3	Fly Ash Spill	
9/03/2018	2	Fly Ash Spill	

Please note that V4 of the PIRMP consolidated the incident list. Incident numbers may be reflective of old versions of the PIRMP.

A sign-off sheet is kept of the personnel present for the undertaking of a PIRMP Drill and a record is kept on when and how the PIRMP is communicated to employees. This information forms a section of the PIRMP Drill document. For more information regarding each of the PIRMP Drills, refer to the specific drill document.

12. PIRMP TESTING

Plans must be tested routinely at least once every 12 months. The testing is to be carried out in such a manner as to ensure that the information included in the plan is accurate and up to date, and that each plan is capable of being implemented in a workable and effective manner.

The objectives of an audit are to maintain compliance with this plan. Internal audits of this Plan will be undertaken every 3 years.

Routine testing of the PIRMP will be conducted annually, and can be completed through the following methods:

- Simulated environmental emergency; or
- Desktop simulations.

13. PIRMP REVIEW

Revisions are to be coordinated by the Site Manager and Environmental Representative.

The objectives of a review are:

- To maintain compliance with the statutory requirements, and
- To identify opportunities for improvement in the Plan, and reduce the risk to human health and the environment

12.1. EVENT BASED

Events which may trigger a review of this Plan or its associated documents include:

- Within 1 month of reporting to the nominated parties in accordance with the plan, after a pollution incident, or
- Modification/Improvement to the system

12.2. TIME BASED

Prestons Cement will review this management plan routinely every 12 months. The Plan review will include:

- This Document, and
- Legislation, Approval and Licence changes.

APPENDIX 1. RISK ASSESSMENT ON POTENTIAL IMPACTS

Hazard and Likelihood Risk Assessment and Corrective Control Measures								
Site: Prestons Cement			Responsible Person: Site Manager/Supervisor			Review Date: 6 October 2020		
Name / ref of pollutant/ chemicals	Description of Hazard / Incident leading to hazard	Consequence	Likelihood	Initial Risk	Factors that could increase risk	Residual risk after implementation of controls	Responsible person	Action date
Diesel/Oils/ Solvents	<p>Incident #1 Minor loss of diesel, oils or vehicle tank rupture</p> <p><u>Risk to environment:</u> hydrocarbons smothering aquatic and plant life, decreases in water quality <u>Risk to human health:</u> contamination of waterbodies</p>	Minor (2)	Unlikely (2)	L	<p>Weather: Dry, windy conditions (increase fire danger) or heavy rain/flood conditions (will increase potential for spill to spread to catchment drainage areas)</p> <p>Location of spill: spills near drainage lines or with equipment near waterbodies have higher risk of material harm.</p> <p>Spills near vegetation or rehabilitation areas have higher fire risk.</p>	<p>Consequence: (Incidental): Rupture of trucks fuel tanks while onsite. Due to volume and sealed yard impact limited to immediate area and potentially first flush pit.</p> <p>Likelihood: (Unlikely): Would need either vandalism or onsite collision between vehicles or site objects to occur. Site is secure, appropriate traffic management plan in place for routes, parking, speed and pedestrians. Spill kits onsite.</p> <p>Residual Risk Assessment = Incidental (1) Vs Unlikely (2) = LOW (2)</p>	As per PIRMP action plan	When required
Airborne Dust	<p>Incident #2 Excessive dust from release of flyash or cement from silos.</p> <p><u>Risk to environment:</u> dust smothering aquatic and plant life <u>Risk to human health:</u> risk of ingestion of fines via respiration. <u>Property:</u> Damage to property from settled dusts.</p>	Incidental (2)	Possible (3)	M	<p>Weather: Dry, windy conditions (increase wind erosion and dust transport). Summer months with long periods of extended dry conditions.</p>	<p>Consequence: (Minor): The nature fly ash and cementitious materials such as cement is that it is very fine and can travel beyond site boundaries if released to the air. The dust can also settle on cars, property and vegetation and solidify if wet.</p> <p>Likelihood: (Possible): It is possible that dust would leave the site in the event of an uncontrolled release of fly ash.</p> <p>Residual Risk Assessment = Incidental (1) Vs Unlikely (1) = Medium (3)</p>	As per PIRMP action plan	When required
Mobile Plant	<p>Incident #2 Significant hydraulic hose or fuel tank failure</p> <p><u>Risk to environment:</u> hydrocarbons</p>	Minor (2)	Unlikely (2)	L	<p>Weather: Dry, windy conditions (increase fire danger) or heavy rain/flood conditions (will increase potential for spill to spread to catchment drainage areas)</p> <p>Location of spill: spills near drainage lines or with</p>	<p>Consequence: (Incidental): Failure from fuel tank or hydraulic hoses would be maintained to a small localised area on site.</p> <p>Likelihood: (Rare): Hose or fuel tank failure from mobile plant would be minimal as prestart and regular maintenance programs are in place to capture and prevent such occurrences. Spills kits are also maintained and available in various areas. Inductions for all contractors demonstrating their accountabilities and</p>	As per PIRMP action plan	When required

	smothering aquatic and plant life, decreases in water quality <u>Risk to human health:</u> contamination of waterbodies				equipment near waterbodies have higher risk of material harm. Spills near vegetation or rehabilitation areas have higher fire risk.	responsibilities for reporting environmental incidents. Residual Risk Assessment = Incidental (1) Vs Rare (1) = LOW (1)		
--	---	--	--	--	--	---	--	--

PART B: INCIDENT RESPONSE ACTIONS AND NOTIFICATION LOGS

13. PIRMP RESPONSE ACTIONS

<h1 style="color: green;">Incident #1</h1>	<p style="color: green;">Uncontrolled loss of Diesel or other hydrocarbon products, sediment laden water or packaged goods that could result in material harm to the environment or human health.</p> <p>Actions Required:</p> <ul style="list-style-type: none"> • Shutdown of processes and equipment associated with the spill if safe to do so • Activation of any associated storm water shut-off valves to isolate and apply spill kit booms, socks or absorbent material etc. • Contact all relevant people/department (refer to Immediate Reporting Contact Sheet) • Prevent any material leaving site or entering the stormwater system • Contact service provider (Ampol No. 1800 033 111or Cleanaway 02 9600 7185) to pump-out first flush pits if required. • Area to be restricted to Incident Response Personnel
<p>Alarm raising</p>	<p>Any personnel involved or witnessing incident to report to immediate supervisor and PIRMP actions to be implemented.</p>
<p>Emergency Controller</p>	<ul style="list-style-type: none"> • Kyle Walker or Norm Azar – Site Manager • Call service provider (Site Manager) • Spill Kit (Supervisor)
<p>Scale of incident</p>	<p>Incident would be restricted to immediate area with minimal external impact. However, potential for bund overflow or failure may result in soil and surface water contamination that will require specialist investigation/remediation.</p>
<p>Evacuate</p>	<p>Only if fire or explosion potential exists. Site Manager and any advice provided by Fire Dept. as part of attendance after immediate notification.</p>
<p>Communications</p>	<p>Internal:</p> <ul style="list-style-type: none"> • – Site Manager • – Environmental Sustainability Manager <p>External mandatory:</p> <ul style="list-style-type: none"> • Immediate Reporting Contact Sheet to be used <p>External non-mandatory: N/A</p>
<p>Rescuer / respondent + safety checks</p>	<p>As per Site Emergency Plan or Fire Department as part of Immediate Reporting</p>
<p>Rescue + First Aid</p>	<p>As per Site Emergency Plan or Fire Department as part of Immediate Reporting</p>
<p>Clean up and Waste disposal</p>	<p>Service Provider to dispose of diesel, oil, grease and advise on required clean-up.</p>
<p>Reporting and re-preparedness</p>	<p>See SOPs:</p> <ul style="list-style-type: none"> • Incident Notification SOP (GRP-HSEQ-3-02)
