MSL celebrates a new heavy lifter

Marulan South Limestone has welcomed the addition of a Komatsu WA900-8R to the site. The primary face loading tool is one of five in Australia and the newest addition to the MSL fleet since 2011. The newest face loader on the market is capable of lifting 28 tonnes of limestone per bucket and can move up to 3.3 million tonnes per year. The loader arrived on site from Mount Thorley in 3 separate pieces and took a team of 3 people and 2 cranes one week to assemble.

Did you know?

The Marulan South Limestone mine has been in operation since 1869. It's no surprise that some employees share the same employment history as their parents and grandparents.

SAFETY MOMENT

Each year in October Work Safe Australia encourages businesses to participate in National Safe Work Month- this year's theme is 'Know Safety, Work Safely'. All employees and contractors across the site stopped and gathered for a 'safe tea', where safety was discussed across all teams.

Rehabilitation

Spring is upon us once again and with the above average rainfall it's the perfect time to ramp up our rehabilitation. Over the next few months we will be tree planting, spreading seed, hydro-mulching and managing weeds and pests throughout our rehabilitation areas!
