3. PURPOSE

The purpose of the Metz Quarry Pollution Incident Response Plan is to:

- Provide direction to the staff at Metz Quarry in responding to pollution incidents at the Metz operations;
- Ensure timely communication about a pollution incident is provided to staff at the
 premises, the Environment Protection Authority (EPA), other relevant authorities
 specified in the Protection of the Environment Legislation Amendment Act (POELA
 Act) (including Armidale Dumaresq Shire Council, NSW Ministry of Health, Work
 Cover NSW, and Fire and Rescue NSW) and persons outside the operations who may
 be affected by the impacts of a pollution incident;
- Minimise and control the risk of a pollution incident at Metz Quarry by identifying key risks and planned actions to minimise and manage those risks;
- Detail the training requirements for this plan, identifying persons responsible for implementing it, and ensuring that the plan is regularly tested for accuracy, currency and suitability.

4. LEGISLATIVE REQUIREMENTS

The specific requirements for a PIRMP are set out in Part 5.7A of the POEO Act and the Protection of the Environment Operations (General) Regulation 2009 (POEO(G) Regulation). In summary, this provision requires the following:

- All holders of environment protection licences must prepare a pollution incident response management plan (section 153A, POEO Act).
- The plan must include the information detailed in the POEO Act (section 153C) and be in the form required by the POEO(G) Regulation (clause 98B).
- Licensees must keep the plan at the premises to which the environment protection licence relates (section 153D, POEO Act).
- Licensees must test the plan in accordance with the POEO(G) Regulation (clause 98E).
- if a pollution incident occurs in the course of an activity so that material harm to the environment is caused or threatened, licensees must immediately implement the plan (section 153F, POEO Act)

5. DEFINITION OF 'POLLUTION INCIDENT'

The definition of a pollution incident is:

"pollution incident means an incident or set of circumstances during or as a consequence of which there is or is likely to be a leak, spill or other escape or deposit of a substance, as a result of which pollution has occurred, is occurring or is likely to occur. It includes an incident or set of circumstances in which a substance has been placed or disposed of on premises, but it does not include an incident or set of circumstances involving only the emission of any noise."

A pollution incident is required to be notified if there is a risk of 'material harm to the environment', which is defined in section 147 of the POEO Act as:

- a) harm to the environment is material if:
 - i. it involves actual or potential harm to the health or safety of human beings or to ecosystems that is not trivial, or
 - ii. it results in actual or potential loss or property damage of an amount, or amounts in aggregate, exceeding \$10,000 (or such other amount as is prescribed by the regulations), and
- b) loss includes the reasonable costs and expenses that would be incurred in taking all reasonable and practicable measures to prevent, mitigate or make good harm to the environment.

Metz Quarry is now required to report pollution incidents immediately to the EPA, NSW Health, Fire and Rescue NSW, WorkCover NSW and the local council.

6. SCOPE

This PIRMP must be followed by employees, contractors and visitors of Metz Quarry, to assist in the early response to and reporting of a pollution incident.

7. POTENTIAL POLLUTING SUBSTANCES

The main hazards to human health and the environment at Metz Quarry are included in the following table.

It is important to note that Metz Quarry is currently in caretaker mode, in preparation for rehabilitation and possible closure. No production has taken place at Metz Quarry since July 2008. The details recorded in the below tables will be updated routinely inline with any changes in the management of the operation and the closure/rehabilitation procedure of the site.

² Early warnings relate to informing neighbours who may be affected by the emission of this substance. If this substance is of a type and quantity which may reach neighbours then early warning assessment of actions is required to be undertaken.

8. ROLES AND RESPONSIBILITIES

Position	Responsibility
Employees and Contractors	Following the procedures outlined in the PIRMP and related documents
	Immediately alerting Supervisor or Team Leader of any environmental incidents or near-misses.
Team Leaders / Front Line Supervisors	Following the procedures outlined in the PIRMP and related documents
	Immediately alerting Site/Quarry Manager or, in case of their unavailability, Environmental Representative or Environment Manager of any potentially material environmental incidents or near-misses. Conducting incident investigations.
Site / Operations Manager and/or Site Environmental Coordinator	Authorisation of the PIRMP Administration, maintenance and implementation of the PIRMP
and/or Environment Manager	Assessing whether the incident has caused or threatens "material environmental harm" and, if so, immediately notifying all Appropriate Regulatory Authorities. Ensuring that investigations are undertaken to a level corresponding to the level of risk and impact.

9. INTERNAL POLLUTION INCIDENT REPORTING

Any pollution incident satisfying the *material harm* threshold must be immediately reported to relevant statutory authorities by either the Site/Operations Manager, or Environment Manager.

In cases where "material harm" level cannot be immediately assessed or insufficient information comes to hand on the severity of the incident, the general advice is to err on the side of caution and notify the Relevant Authorities with a qualification that the situation could not yet be fully assessed.

Until further notice the following procedure needs to be followed:

- 1. When a pollution incident occurs, a person who has become aware of it must immediately bring it to the attention of his/her immediate Supervisor or Manager
- 2. If necessary, first ring "000" for Emergency Services
- 3 At least one of the following BCM personnel must be contacted **immediately**:

Whilst personal contact details for the following are available in the Controlled on site Pollution Incident Response Management Plan they do not appear in this public document.

Name	Function	Phone number	Mobile number
	Metz Quarry Manager		
	Metz Quarry Supervisor		
	HSE Advisor		
	Environmental Advisor		
	Environment Operations Manager – NSW/ACT		

- 4. Peter Toole or in case of his unavailability one of the Senior Management personnel listed above, is to **immediately** notify all Appropriate Regulatory Authorities specified in Section 4.3.
- 5. In borderline situations, where the exceedance of the trigger level of "material harm" of a pollution incident may not be clear, a quick assessment including consultation with Boral environmental personnel should be undertaken to help the decision whether to notify or not.

6. Boral's Senior Management must be informed promptly of the fact of immediate notification to the Authorities. This includes environmental personnel listed above, as well as Richard Tomkins, David Bolton, Greg Price and Anthony Henderson.

10. EXTERNAL POLLUTION INCIDENT REPORTING

As the legislation requires that notification must be done immediately upon becoming aware of the pollution incident, it is unlikely that a detailed picture will be available for reporting. Notwithstanding, is seems that some of the Government Authorities prepared a detailed questionnaire which is being filled at the time of this initial notification. Under the stress of incident handling it could be easy to provide a hasty, inaccurate estimate of the situation when answering these questions.

Therefore, the notification should be restricted to the facts known and nothing should be assumed or guessed. The details will be provided to the asking Authority later when more information comes to hand.

The initial notification should include as much of the following information (if known) as possible:

- location and time of the pollution incident
- type of the incident (spill, fire, unlicensed harmful discharge, etc)
- assessed level of incident gravity: "it seems to be..." (e.g. "a relatively minor spill"; "major fire", "explosion limited to one building", etc.)
- whether the Emergency Services have been required to attend.

Unless known for a fact, the answers to other questions should be politely deferred until a better assessment of the situation can be made.

The Boral person who is responsible for notifying the Authorities (Site/Operations Manager or Environment Manager) about the incident must prepare a Notification Log (a suitable form is attached) with the details of time of notifications and the persons who took to the call. The Authorities are expected to log the calls but early indications are that this is not always the case.

Notification of all Appropriate Government Authorities (at least 5 entities) may take considerable time. Delays may be experienced connecting to the right person or no contact may be possible after hours. All such instances should be recorded in the Notification Log.

11. POLLUTION INCIDENT AUTHORITY CONTACT LIST

Government Authority - compulsory notifications	Emergency notification phone number
EPA – Environment Line	131 555
Fire and Rescue NSW (FRNSW)	1300 729 579
Armidale Dumaresq Council	02 6770 3600
Public Health Unit (Tamworth HNE AHS)	02 6764 8000 (Diverts to Public Health Officer on Call)
WorkCover Authority of NSW	131050 Company ABN if asked: 51 000 187 002
Government Authority - ring if relevant	Emergency notification phone number
Government Authority - ring if relevant Police & Ambulance	Emergency notification phone number
	number
Police & Ambulance	number 000
Police & Ambulance Roads and Maritime Services (road spills)	number 000 132 701
Police & Ambulance Roads and Maritime Services (road spills) NSW Office of Water	number 000 132 701 8838 7885

Communication with the local community may also be undertaken depending on the circumstances of the pollution incident. Metz Quarry would consider the following options for providing Early Warning and ongoing information to the community on pollution incidents:

- Direct phone contact with any local residents directly impacted by the pollution incident
- Letter Box drops of incident information and site contacts to local residents impacted by the pollution incident
- The inclusion of incident details within the relevant Quarry Community Newsletter

The Stakeholder Relations Manager can assist in the process of communicating with the community, as per the Stakeholder Engagement Plan for the site.

12. INCIDENT RESPONSE TRAINING

Metz Quarry will implement the Pollution Incident Response Management Plan by training or providing information to relevant employees and contractors in relevant areas of the Plan.

Training or information will be provided on the following;

- The contents and intent of this PIRMP,
- The roles and responsibilities of site staff in relation to this PIRMP
- Spill response procedures;
- General environmental awareness; and / or
- Hazardous materials awareness.

13. PIRMP AUDIT

The objectives of an audit are to maintain compliance with this plan. Internal audits of this Plan will be undertaken every 3 years.

Routine testing of the plan will be conducted annually, and can be completed through the following methods:

- Simulated environmental emergency, or
- Desktop simulations.

14. PIRMP REVIEW

Revisions are to be coordinated by the Site Manager and Environmental Representative.

The objectives of a review are:

- To maintain compliance with the statutory requirements, and
- To identify opportunities for improvement in the Plan, and reduce the risk to human health and the environment

12.1. EVENT BASED

Events which may trigger a review of this Plan or its associated documents include:

- Within 1 month of reporting to the nominated parties in accordance with the plan,
 after a pollution incident, or
- Modification/Improvement to the system

12.2. TIME BASED

Metz Quarry will review this management plan routinely every 12 months. The Plan review will include:

- This Document, and
- Legislation, Approval and Licence changes.

APPENDIX 1 – RISK ASSESSMENT on POTENTIAL IMPACTS

		Hazard	and Lil	keliho	od Risk Ass	sessment and Corrective Co	ontrol Measures

APPENDIX 2 – PIRMP RESPONSE ACTIONS

Incident No 1

ш						
Incident [#] 1	Catastrophic failure of one/both diesel tanks.					
	Actions Required:					
	 Contact all relevant people/department (refer to Immediate Reporting Contact Sheet) 					
	Ensure bunds are capturing full volume of diesel					
	 Ensure bund integrity is sound throughout the entire period of incident (i.e. periodic inspections) 					
	• Contact service provider (Caltex No. 1800033111 or Transpacific 02 96007185) to pump-out bund contents					
	Area to be restricted to Incident Response Personnel					
	Ensure spill kit available for any release from bund					
	If any release from bund onto unsealed soil/surface water - Environmental Consultants to be engaged to					
	investigate and remediate contamination.					
	Repair/replace tanks					
	Refuel tanks					
	Inspect bund for ongoing serviceability					
Alarm raising	Any personnel involved or witnessing incident to report to immediate supervisor and PIRMP actions to be					
	implemented.					
Emergency Controller	Quarry Manager					
	Call service provider (Quarry Manager)					
	Spill Kit manager (Supervisor)					
	 Periodic inspections and update reporting of site and bund (Quarry Manager) 					
Scale of incident	Incident would be restricted to Diesel/Precoast storage area with minimal external impact, however, potential for					
	bund overflow or failure may result in soil and surface water contamination that will require specialist					
	investigation/remediation.					
Evacuate	Only if fire or explosion potential exists. Quarry Manager and any advice provided by Fire Dept as part of attendance					
	after immediate notification.					
Communications	Internal:					
	Quarry Manager					
	Environmental Manager &/or HSE Advisor					
	External mandatory:					
	Immediate Reporting Contact Sheet to be used					
	External non-mandatory: N/A					
Rescuer / respondent + safety checks	As per Site Emergency Plan or Fire Department as part of Immediate Reporting					
Rescue + First Aid	As per Site Emergency Plan or Fire Department as part of Immediate Reporting					

Metz Quarry – PIRMP-V8 17 of 31

Clean up and Waste disposal	Service Provider to dispose of diesel and advise on required clean-up.	
Reporting and re-preparedness	See Incident Notification SOP (GRP-HSEQ-3-02)	

Loss of Fuel due to filling and refueling from one/both diesel tanks. Actions Required: Contact all relevant people/department (refer to Immediate Reporting Contact Sheet) Ensure bunds are capturing full volume of diesel Ensure bunds are capturing full volume of diesel Ensure bund integrity is sound throughout the entire period of incident (i.e. periodic inspections) Contact service provider (Caltex No. 1800033111 or Transpacific 02 96007185) to pump-out bund contents Area to be restricted to Incident Response Personnel Ensure spill kit available for any release from bund If any release from bund onto unsealed soil/surface water - Environmental Consultants to be engaged to investigate and remediate contamination.
