Liaison Group Meeting
The Northern Outlook, 69 Redlynch Road, Redlynch

ATTENDEES

Neighbours (Community Participants)
- Pat Flanagan
- Tanya Shorey, representative - The Northern Outlook

Cairns Regional Council
- Cr Linda Cooper, Division 6, Cairns Regional Council

Boral:
- Elke Stapf, Stakeholder Manager (Northern Region) - Chair
- Andrew Lyndon, Property & Development Manager, BPG Qld
- Sean Willmot, Supervisor Redlynch Quarry
- Kirk Lang, Sales Manager – Concrete & Quarries Country Qld (North)

Apologies
- Mark Dillon, Development & Engineering
- Mark Cavicchiolo, Principal Environmental Officer, North Region, EHP
- Glen Mollenhauer, neighbour
- Garry & Julie Hooper
- Sam Hatchard, Operations Manager - Country QLD, Boral
- Jessica Van Soest, HSE Advisor, Boral
- Deon Wilde, Account Manager – Cairns & Far North Qld (Concrete & Quarries)
- Paul West, Regional Manager (Northern Region) - Boral Property Group

Meeting started at 5.15pm

Elke read out apologies.

Introductions:
- Sean Willmot, Supervisor Redlynch Quarry

Operational Update
Elke provided an operational update:
- The Redlynch Quarry is open for Sales
- Market is still slow (production scaled back based on market demand)
- Market conditions will dictate the timing of the quarry development
- We will continue our stakeholder engagement and liaison group meetings - however scale back frequency to 2 meetings per year. However we would encourage anyone who has any issues or queries to contact Sean Wilmot at the quarry 4039 1206 or myself Elke Stapf 3867 7470 at the Brisbane office.

Action Items from last meeting (10 June 2015)

Elke presented the dust & blast monitoring results:
Boral monitors are positioned at three locations: Housing Estate (north-east), CCHP residence (west of the quarry), Site Office – Weighbridge.
Dust monitoring
Compliance Limit: 150 mg/m²/day
Dust monitoring results between June 2015 and September 2015 were within compliance limits at all monitors during the monitoring period. June was a very wet month; results were collected in July – therefore dust results are lower than normal.
Results varied from less than 5 mg/m²/day to 73 mg/m²/day.
There were no dust issues to report from the neighbours.

Blast monitoring
There have been no blasts at Redlynch since the last meeting (10 June).
The last blast occurred on 21 May 2015.
There are no immediate plans for a blast in the near future.
Our procedure is to notify neighbours of blasts via telephone before they occur.

Cultural Heritage Agreements
All survey works have now been completed concerning all three cultural heritage agreements with local aboriginal groups:
Yirrganydi (Irukandji) - executed on 19 February 2015
Djabugay People – executed on 9 October 2014
Gimuy Walubara Yidinji - executed on 10 July 2014

No items of aboriginal cultural heritage significance were found.

Community / Council Project – Machan Beach Seawall Reconstruction
Council held an official opening of the completion of the Machan Beach seawall on Saturday, 15 August 2015. The materials for the project were delivered from the Redlynch Quarry – in excess of 56 thousand tonnes. Elke presented photos of the event.

Local School Projects – in connection with Boral’s partnership with Conservation Volunteers Australia:
Elke has visited two locals’ schools to review the progress of projects that Boral assists with:
- **Redlynch State College**: we assisted in revamping the school’s frog pond including a self-watering system for the plants; Boral supplied 10m³ of crusher dust to improve school walkways and various areas of the school; and their cooking project is progressing well, with established vegetable gardens providing some produce for the program.
- **St Andrews Catholic College**: Boral continues to provide sponsorship towards their rice growing project; we are also assisting a local community project outside the school at Freshwater Creek with providing free volunteers; for next year, we are looking into assisting with a proposed project that includes the growing of bush tucker in their existing aboriginal gardens.

Community Leadership – Recognition by the Industry Body - CCAA
Boral received recognition from the Industry - Cement Concrete and Aggregates Australia – for Boral’s commitment to stakeholder engagement and in supporting the community & various organisations at one of their Qld quarry operations.

CCAA Environment, Health and Safety Awards 2015
Award Winner – Community Leadership Category
**Ormeau Quarry Long-Term Community Relationship Initiatives**
Recognition for a twenty year partnership with Landcare, the Pimpama River Revegetation Partnership, the Darlington Conservation House, and the Boral Environmental Reserve.
Working together, with the focus on long-term relationships & common goals, and in embracing the flow-on effects. Boral is committed to stakeholder engagement and will continue to support the community and community organisations into the future.
Current Local News
- Cr Linda Cooper spoke about local Council projects such as the Red, Blue & Green Arrow walking tracks (popular with locals and tourists, tracking through the Mt Whitfield Conservation Park, located centrally behind the Cairns Botanic Gardens) and Council’s Erosions & Sediment control plans in the area,
- Pat Flanagan upheld a positive outlook on the proposed local project ‘Aquis’.

Meeting closed 5.50pm

Next Meeting date: 8 June 2016, 5pm, The Northern Outlook, 69 Redlynch Rd, Redlynch.
