# PART A: COMPLIANCE REQUIREMENTS, POLLUTION INVENTORIES AND RISK ASSESSMENTS

#### 1. PURPOSE

The purpose of the Seven Hills Asphalt Pollution Incident Response Plan is to:

- Provide direction to the staff at Seven Hills Asphalt in responding to pollution incidents at the Seven Hills operations;
- Ensure timely communication about a pollution incident is provided to staff at the premises, the Environment Protection Authority (EPA), other relevant authorities specified in the Protection of the Environment Legislation Amendment Act (POELA Act) (including Blacktown Council, NSW Ministry of Health, Work Cover NSW, and Fire and Rescue NSW) and persons outside the operations who may be affected by the impacts of a pollution incident;
- Minimise and control the risk of a pollution incident at Seven Hills Asphalt by identifying key risks and planned actions to minimise and manage those risks;
- Detail the training requirements for this plan, identifying persons responsible for implementing it, and ensuring that the plan is regularly tested for accuracy, currency and suitability.
- A hard copy of the PIRMP is to be kept on the site environmental board in the Seven Hills Asphalt Main Office. A soft copy of the PIRMP and EPL 6893 is made available online https://www.boral.com.au/our-commitment/environmental-reporting.

### 2. LEGISLATIVE REQUIREMENTS

The specific requirements for a Pollution Incident Response Management Plan (PIRMP) are set out in Part 5.7A of the POEO Act and the Protection of the Environment Operations (General) Regulation 2009 (POEO (G) Regulation). Part 3A of the POEO Act and the Protection of the Environment Operations (General) Regulation 2009 (POEO (G) Regulation) describes specific components and requirements of a PIRMP.

Table 2 summarises the location of these requirements within the document.

Table 2: Summary of Legislative Requirements of a PIRMP

Section/Clause	Requirement	Location in PIRMP
	Part 5.7A POEO Act 1997	
147	(1) For the purposes of this Part—  (a) harm to the environment is material if—  (i) it involves actual or potential harm to the health or safety of human beings or to ecosystems that is not trivial, or  (ii) it results in actual or potential loss or property damage of an amount, or amounts in aggregate, exceeding \$10,000 (or such other amount as is prescribed by the regulations), and  (b) loss includes the reasonable costs and expenses that would be incurred in taking all reasonable and practicable measures to prevent, mitigate or make good harm to the environment.  (2) For the purposes of this Part, it does not matter that harm to the environment is caused only in the premises where the pollution incident occurs.	Section 3
153A	The holder of an environment protection licence must prepare a pollution incident response management plan that complies with this Part in relation to the activity to which the licence relates.	EPL 6893 and this document
153C	A pollution incident response management plan must be in the form required by the regulations and must include the following—  (a) the procedures to be followed by the holder of the relevant environment protection licence, or the occupier of the relevant premises, in notifying a pollution incident to—  (i) the owners or occupiers of premises in the vicinity of the premises to which the environment protection licence or the direction under section 153B relates, and  (ii) the local authority for the area in which the premises to which the environment protection licence or the direction under section 153B relates are located and any area affected, or potentially affected, by the pollution, and  (iii) any persons or authorities required to be notified by Part 5.7,	Section 7 and 8  Section 4  Section 6, 7, 8, 9 and 14  Section 6, 7, 8, 9 and 14

	(b) a detailed description of the action to be taken, immediately after a pollution incident, by the holder of the relevant environment protection licence, or the occupier of the relevant premises, to reduce or control any pollution,	Section 13
	(c) the procedures to be followed for coordinating, with the authorities or persons that have been notified, any action taken in combating the pollution caused by the incident and, in particular, the persons through whom all communications are to be made,	Section 6, 7, 8, 9 and 14
	(d) any other matter required by the regulations.	Section 8, 13
153D	A person who is required to prepare a pollution incident response management plan under this Part must ensure that it is kept at the premises to which the relevant environment protection licence relates, or where the relevant activity takes place, and is made available in accordance with the regulations.	Section 1
153E	A person who is required to prepare a pollution incident response management plan under this Part must ensure that it is tested in accordance with the regulations	Section 10,11
153F	If a pollution incident occurs in the course of an activity so that material harm to the environment (within the meaning of section 147) is caused or threatened, the person carrying on the activity must immediately implement any pollution incident response management plan in relation to the activity required by this Part	Section 3, Section 13
Part 3	A POEO(G) Regulation 2009 Pollution Incident Response Manage	ement Plans

	A description of the hazards to human health or the environment associated with the activity to which the licence relates,  The likelihood of any such hazards occurring, including details of any conditions or events that could, or would,	
98C(1) (b)	A description of the hazards to human health or the environment associated with the activity to which the licence relates,  The likelihood of any such hazards occurring, including details of any conditions or events that could, or would, increase that likelihood,  Details of the pre-emptive action to be taken to minimise or prevent any risk of harm to human health or the	Appendix 1  Section 8, Appendix 1,
98C(1) (b) 98C(1) (c)	A description of the hazards to human health or the environment associated with the activity to which the licence relates,  The likelihood of any such hazards occurring, including details of any conditions or events that could, or would, increase that likelihood,  Details of the pre-emptive action to be taken to minimise or prevent any risk of harm to human health or the environment arising out of the relevant activity  An inventory of potential pollutants on the premises or used	Appendix 1  Section 8, Appendix 1, Section 13
98C(1) (b) 98C(1) (c) 98C(1) (d)	A description of the hazards to human health or the environment associated with the activity to which the licence relates,  The likelihood of any such hazards occurring, including details of any conditions or events that could, or would, increase that likelihood,  Details of the pre-emptive action to be taken to minimise or prevent any risk of harm to human health or the environment arising out of the relevant activity  An inventory of potential pollutants on the premises or used in carrying out the relevant activity  A description of the safety equipment or other devices that are used to minimise the risks to human health or the	Appendix 1  Section 8, Appendix 1, Section 13  Section 5
98C(1) (b)  98C(1) (c)  98C(1) (d)  98C(1) (f)	A description of the hazards to human health or the environment associated with the activity to which the licence relates,  The likelihood of any such hazards occurring, including details of any conditions or events that could, or would, increase that likelihood,  Details of the pre-emptive action to be taken to minimise or prevent any risk of harm to human health or the environment arising out of the relevant activity  An inventory of potential pollutants on the premises or used in carrying out the relevant activity  A description of the safety equipment or other devices that are used to minimise the risks to human health or the environment and to contain or control a pollution incident, the names, positions and 24-hour contact details of those key individuals who:  I. are responsible for activating the plan, and	Appendix 1  Section 8, Appendix 1, Section 13  Section 5  Section 5, Appendix 1
98C(1) (b)  98C(1) (c)  98C(1) (d)  98C(1) (f)	A description of the hazards to human health or the environment associated with the activity to which the licence relates,  The likelihood of any such hazards occurring, including details of any conditions or events that could, or would, increase that likelihood,  Details of the pre-emptive action to be taken to minimise or prevent any risk of harm to human health or the environment arising out of the relevant activity  An inventory of potential pollutants on the premises or used in carrying out the relevant activity  A description of the safety equipment or other devices that are used to minimise the risks to human health or the environment and to contain or control a pollution incident, the names, positions and 24-hour contact details of those key individuals who:	Appendix 1  Section 8, Appendix 1, Section 13  Section 5  Section 5, Appendix 1
98C(1) (b)  98C(1) (c)  98C(1) (d)  98C(1) (f)	A description of the hazards to human health or the environment associated with the activity to which the licence relates,  The likelihood of any such hazards occurring, including details of any conditions or events that could, or would, increase that likelihood,  Details of the pre-emptive action to be taken to minimise or prevent any risk of harm to human health or the environment arising out of the relevant activity  An inventory of potential pollutants on the premises or used in carrying out the relevant activity  A description of the safety equipment or other devices that are used to minimise the risks to human health or the environment and to contain or control a pollution incident, the names, positions and 24-hour contact details of those key individuals who:  I. are responsible for activating the plan, and  II. are authorised to notify relevant authorities under	Appendix 1  Section 8, Appendix 1, Section 13  Section 5  Section 5, Appendix 1
98C(1) (b)  98C(1) (c)  98C(1) (d)  98C(1) (f)	A description of the hazards to human health or the environment associated with the activity to which the licence relates,  The likelihood of any such hazards occurring, including details of any conditions or events that could, or would, increase that likelihood,  Details of the pre-emptive action to be taken to minimise or prevent any risk of harm to human health or the environment arising out of the relevant activity  An inventory of potential pollutants on the premises or used in carrying out the relevant activity  A description of the safety equipment or other devices that are used to minimise the risks to human health or the environment and to contain or control a pollution incident, the names, positions and 24-hour contact details of those key individuals who:  I. are responsible for activating the plan, and  II. are authorised to notify relevant authorities under section 148 of the Act, and  III. are responsible for managing the response to a	Appendix 1  Section 8, Appendix 1, Section 13  Section 5  Section 5, Appendix 1

the vicinity of the premises to which the licence relates or	
where the scheduled activity is carried on	
The arrangements for minimising the risk of harm to any	Section 8, Appendix 1
persons who are on the premises or who are present where	
the scheduled activity is being carried on	
A detailed map (or set of maps) showing the location of the	Figure 1-3
premises to which the licence relates, the surrounding area	
that is likely to be affected by a pollution incident, the	
location of potential pollutants on the premises and the	
location of any stormwater drains on the premises	
A detailed description of how any identified risk of harm to	Section 8, Appendix 1
human health will be reduced, including (as a minimum) by	
means of early warnings, updates and the action to be taken	
during or immediately after a pollution incident to reduce	
that risk,	
The nature and objectives of any staff training program in	Section 10
relation to the plan	
The dates on which the plan has been tested and the name	Table 6
of the person who carried out the test,	
The dates on which the plan is updated,	Document Control
	Sheet
The manner in which the plan is to be tested and maintained.	Section 10, 11, 12
	where the scheduled activity is carried on  The arrangements for minimising the risk of harm to any persons who are on the premises or who are present where the scheduled activity is being carried on  A detailed map (or set of maps) showing the location of the premises to which the licence relates, the surrounding area that is likely to be affected by a pollution incident, the location of potential pollutants on the premises and the location of any stormwater drains on the premises  A detailed description of how any identified risk of harm to human health will be reduced, including (as a minimum) by means of early warnings, updates and the action to be taken during or immediately after a pollution incident to reduce that risk,  The nature and objectives of any staff training program in relation to the plan  The dates on which the plan has been tested and the name of the person who carried out the test,  The dates on which the plan is updated,

## 3. DEFINITION OF 'POLLUTION INCIDENT'

The definition of a pollution incident is:

"pollution incident means an incident or set of circumstances during or as a consequence of which there is or is likely to be a leak, spill or other escape or deposit of a substance, as a result of which pollution has occurred, is occurring or is likely to occur. It includes an incident or set of circumstances in which a substance has been placed or disposed of on premises, but it does not include an incident or set of circumstances involving only the emission of any noise."

A pollution incident is required to be notified if there is a risk of 'material harm to the environment', which is defined in section 147 of the POEO Act as:

- a) Harm to the environment is material if:
  - i. it involves actual or potential harm to the health or safety of human beings or to ecosystems that is not trivial, or

ii. it results in actual or potential loss or property damage of an amount, or amounts in aggregate, exceeding \$10,000 (or such other amount as is prescribed by the regulations), and

b) Loss includes the reasonable costs and expenses that would be incurred in taking all reasonable and practicable measures to prevent, mitigate or make good harm to the environment.

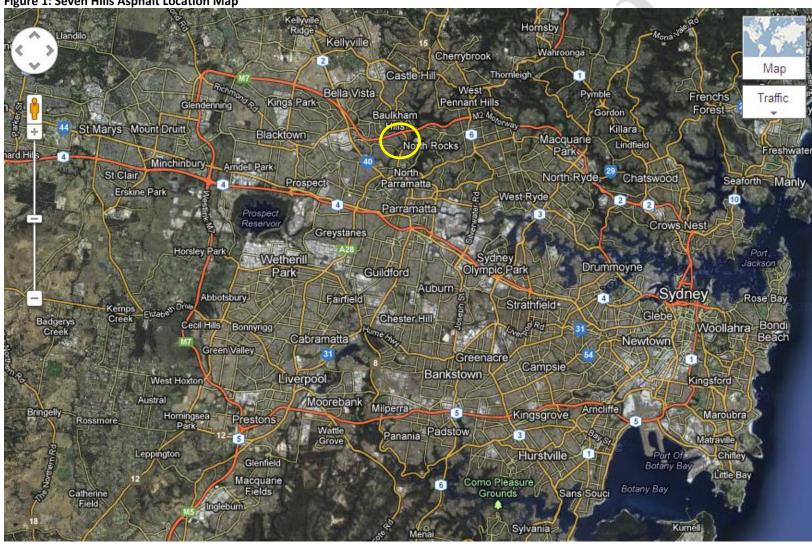

Seven Hills Asphalt is now required to report non-trivial pollution incidents immediately to the EPA, NSW Health, Fire and Rescue NSW, WorkCover NSW and the local council.

#### 4. SCOPE

This PIRMP must be followed by employees, contractors and visitors of Seven Hills Asphalt, to assist in the early response to and reporting of a pollution incident. Seven Hills asphalt is owned and occupied by Boral Resources (NSW) and is operated under Environmental Protection Licence 6893.

#### **5. SITE LAYOUT**

Seven Hills Asphalt – PIRMP\_V15

#### **6. POTENTIAL POLLUTING SUBSTANCES**

Table 3 below is an inventory of potential pollutants kept on the premises. This inventory provides a description of the main hazards to human health or the environment, an assessment of the likelihood of the hazards occurring and also includes the current controls and safety equipment and/ or pre-emptive actions in place to minimise or prevent risk of harm to human health or the environment.

**Table 3: Potential Pollutants**

<sup>&</sup>lt;sup>2</sup> Early warnings relate to informing neighbours who may be affected by the emission of this substance. If this substance is of a type and quantity which may reach neighbours then early warning assessment of actions is required to be undertaken.

## 7. ROLES AND RESPONSIBILITIES

**Table 4: Site Roles and Responsibilites** 

Position	Responsibility
Employees and Contractors	Following the procedures outlined in the PIRMP and related documents
	Immediately alerting Supervisor or Team Leader of any environmental incidents or near-misses.
Team Leaders / Front Line Supervisors	Following the procedures outlined in the PIRMP and related documents (HSEQ MS 3-02)
	Immediately alerting Site/Operations Manager or, in case of their unavailability, Environmental Representative or Environment Manager of any potentially material environmental incidents or near-misses.
	Assist in conducting incident investigations.
Site Manager and/or Site Environmental Advisor and/or	Authorisation of the PIRMP Administration, maintenance and implementation of the PIRMP
Environment Manager	Assessing whether the incident is non-trivial and has caused or threatens "material environmental harm" and communicate details to management.
	Provide direction and advice on incident response
	Coordinate communication to neighbours through Stakeholder Relations Manager
	Ensuring that investigations are undertaken to a level corresponding to the level of risk and impact.
HSE Regional Manager and/or Regional Environment	Make a determination as to whether the incident (as defined in section 147 of the POEO Act) is non-trivial and therefore reportable to external agencies
Manager	Inform Executive General manager and Group management of Notification to External Agencies
	Undertake notifications as defined in PIRMP
	Authorise notifications to public and/or media following GRP-HSEQ-2-02

#### 8. INTERNAL POLLUTION INCIDENT REPORTING

Any pollution incident satisfying the *material harm* threshold must be immediately reported to relevant statutory authorities by either the Site/Operations Manager, or regional Environment Manager.

In cases where "material harm" level cannot be immediately assessed or insufficient information comes to hand on the severity of the incident, the general advice is to err on the side of caution and notify the Relevant Authorities with a qualification that the situation could not yet be fully assessed.

Until further notice the following procedure needs to be followed:

- 1. When a pollution incident occurs, a person who has become aware of it must immediately bring it to the attention of his/her immediate Supervisor or Manager
- 2. If necessary, first ring "000" for Emergency Services
- At least one of the following BCM personnel must be contacted **immediately**:

Whilst personal contact details for the following are available in the Controlled on site Pollution Incident Response

Management Plan they do not appear in this public document.

**Table 5: Site Contacts** 

Name	Function	Phone number	Mobile number
	Site Manager		
	Environmental Business Partner		
	Production Manager – Asphalt		
	Senior Environmental Business Partner NSW/ACT		

- 4. The Seven Hills Site Manager, or in case of his unavailability one of the Senior Management personnel listed above, is to **immediately** notify the NSW HSE Regional Manager or Regional Environment Manager.
- 5. NSW HSE Regional Manager to immediately notify all Appropriate Regulatory Authorities specified in Section 9.

Seven Hills Asphalt - PIRMP\_V15

- 6. In borderline situations, where the exceedance of the trigger level of "material harm" of a pollution incident may not be clear, a quick assessment including consultation with Boral environmental personnel should be undertaken to help the decision whether to notify or not.
- 7. Boral's Senior Management must be informed promptly of the fact of immediate notification to the Authorities.

## 9. EXTERNAL POLLUTION INCIDENT REPORTING

As the legislation requires that notification must be done immediately upon becoming aware of the pollution incident, it is unlikely that a detailed picture will be available for reporting. Notwithstanding, it seems that some of the Government Authorities prepared a detailed questionnaire, which is being filled at the time of this initial notification. Under the stress of incident handling it could be easy to provide a hasty, inaccurate estimate of the situation when answering these questions.

Therefore, the notification should be restricted to the facts known and nothing should be assumed or guessed. The details will be provided to the asking Authority later when more information comes to hand.

The initial notification should include as much of the following information (if known) as possible:

- Location and time of the pollution incident
- Type of the incident (spill, fire, unlicensed harmful discharge, etc)
- Assessed level of incident gravity: "it seems to be..." (e.g. "a relatively minor spill"; "major fire", "explosion limited to one building", etc.)
- Whether the Emergency Services have been required to attend.

Unless known for a fact, the answers to other questions should be politely deferred until a better assessment of the situation can be made.

The Boral person who is responsible for notifying the Authorities (NSW HSE Regional Manager or Regional Environment Manager) about the incident as per the contact details in Table 5, must prepare a Notification Log (a suitable form is attached in Section 14) with the details of time of notifications and the persons who took to the call. The Authorities will generally provide an Incident Notification Number.

Notification of all Appropriate Government Authorities (at least 5 entities) may take considerable time. Delays may be experienced connecting to the right person or no contact may be possible after hours. All such instances should be recorded in the Notification Log.

#### 10. POLLUTION INCIDENT AUTHORITY CONTACT LIST

**Table 6: External Authority Contact List** 

Government Authority - compulsory notifications	Emergency notification phone number
EPA – Environment Line	131 555
Fire and Rescue NSW (FRNSW)	1300 729 579
Blacktown City Council	9839 6000 (24hr) 1300 133 491
Public Health Unit (Camperdown) – Sydney South West AHS	HealthLink (24 hr): 0 - 1800 063 635 Head Office — Camperdown: 0 - (02) 9515 9420
WorkCover Authority of NSW	13 10 50 Company ABN if asked: 51 000 187 002
Government Authority - ring if relevant	Emergency notification phone number
Roads and Maritime Services (road spills)	132 701
NSW Office of Water	8838 7885
Bush Fire Control Officer	1800 049 933
Poisons Information Centre	131 126
Endeavour Energy (power line emergencies)	131 003
Police & Ambulance	000

Communication with the local community may also be undertaken depending on the circumstances of the pollution incident. Seven Hills Asphalt would consider the following

Seven Hills Asphalt - PIRMP\_V15

options for providing Early Warning and ongoing information to the community on pollution incidents:

- Direct phone contact with any local residents directly impacted by the pollution incident
- Letter Box drops of incident information and site contacts to local residents impacted by the pollution incident

The Stakeholder Relations Manager can assist in the process of communicating with the community, as per the Stakeholder Engagement Plan for the site.

#### 11. INCIDENT RESPONSE TRAINING

Seven Hills Asphalt will implement the Pollution Incident Response Management Plan by training or providing information to relevant employees and contractors in relevant areas of the Plan.

The nature and objectives of staff training is to relate to site personnel the importance of early notification of any incidents and spills to site supervisors and key personnel.

Training or information will be provided on the following;

- The contents and intent of this PIRMP,
- The roles and responsibilities of site staff in relation to this PIRMP
- Spill response procedures;
- General environmental awareness; and / or
- Hazardous materials awareness.

Site inductions for visitors and sub-contractors also advise individuals to report any environmental incidents or spills to site supervisors and key personnel immediately. Key site personnel and supervisors participate in PIRMP Tests which are used as practical training and can also be used to identify any potential gaps or areas for improvement for the PIRMP. A summary of the PIRMP Drills undertaken at Seven Hills Asphalt is shown below in Table 6.

Table 7: PIRMP Drills Undertaken at Seven Hills Asphalt

Test Date	Version tested	Incident Drilled	Drill Team Lead
20 September 2019	Version 9	Emulsion leak from supply hose to the emulsion tank	
29 October 2020	Version 12	Scenario 1. Response to a burst fuel hose during transfer from the site diesel tank.  Scenario 2. Response to a diesel spill created when a jerry can is knocked over during filling of a secondary jerry can.	
1 <sup>st</sup> October 2021	Version13	The ground surface of the yard is sealed. Given the topography of the site where the spill occurred itcould be likely to enter the storm water drain on the roadway if the response is not quick and effective.  Desktop walk through of Catastrophic failure of above ground emulsion tank resulting inmaterial harm to the environment.	
September 2022	Version13	PIRMP Review Review contents and contacts within the PIRMP to ensure accurate and reflects recent staff changes	

Please note that V12 of the PIRMP consolidated the incident list. Incident numbers may be reflective of old versions of the PIRMP.

A sign-off sheet is kept of the personnel present for the undertaking of a PIRMP Drill and a record is kept on when and how the PIRMP is communicated to employees. This information forms a section of the PIRMP Drill document. For more information regarding each of the PIRMP Drills, refer to the specific drill document.

#### 12. PIRMP TESTING

Plans must be tested routinely at least once every 12 months. The testing is to be carried out in such a manner as to ensure that the information included in the plan is accurate and up to date, and that each plan is capable of being implemented in a workable and effective manner.

The objectives of an audit are to maintain compliance with this plan. Internal audits of this Plan will be undertaken every 3 years.

Routine testing of the PIRMP will be conducted annually, and can be completed through the following methods:

- Simulated environmental emergency; or
- Desktop simulations.

#### 13. PIRMP REVIEW

Revisions are to be coordinated by the Site Manager and Environmental Representative.

The objectives of a review are:

- To maintain compliance with the statutory requirements, and
- To identify opportunities for improvement in the Plan, and reduce the risk to human health and the environment

#### 13.1. EVENT BASED

Events which may trigger a review of this Plan or its associated documents include:

- Within 1 month of reporting to the nominated parties in accordance with the plan, after a pollution incident, or
- Modification/Improvement to the system

#### **13.2. TIME BASED**

Seven Hills Asphalt will review this management plan routinely every 12 months. The Plan review will include:

- This Document, and
- Legislation, Approval and Licence changes.

## **APPENDIX 1. RISK ASSESSMENT ON POTENTIAL IMPACTS**

		Haza	rd and L	ikelih	ood Risk Assessment	and Corrective (	Control Measures

# PART B: INCIDENT RESPONSE ACTIONS AND NOTIFICATION LOGS

## 14. PIRMP RESPONSE ACTIONS

Incident #1  Catastrophic failure of above ground emulsion tank resulting in material harm to the environment. Loss of product due to filling from emulsion tank resulting in material harm to the environment. Actions Required:  • Contact all relevant people/department (refer to Immediate Reporting ContactSheet) • Ensure bunds are capturing full volume of emulsion • Ensure bund integrity is sound throughout the entire period of incident (i.e., periodic inspections) • Contact service provider (Cleanaway 02 96007185) to pump-out bund contents • Area to be restricted to Incident Response Personnel • Ensure spill kit or raw materials are available for any release from bund • If any release from bund onto unsealed soil/surface water - EnvironmentalConsultants to be engaged to investigate and remediate contamination. • Contact electrician or authorized person to isolate electrical components • Arrange to remove residual tank contents to prevent further leakage or inpreparation for repair • Secure fill point lock keys in Site Managers office. • Repair/replace tank • Inspect bund for ongoing serviceability • Repair bund if required • Provide the all clear for use prior to fill up.  Alarm raising  Any personnel involved or witnessing incident to report to immediate supervisor and PIRMP actions to be implemented.  Emergency  Controller  • Site Manager • Call service provider – Site manager • Call service provider – Site manager (Supervisor or Team Leader) • Periodic inspections and update reporting of site and bund (Site Manager) Incident would be restricted to emulsion storage area with minimal external impact, however, potential for bund overflow or failure amy result in surface water contamination that will require specialist investigation. Soil contamination is unlikely, as the site is sealed. Spill control; process should ensure emulsion does not enter waterways or leave site.  Evacuate  Only if fire or explosion potential exists. Site Manager and any advice provided by Fire Depts apart of attendance after immediate n
